TITLE State Superintendent of Education: State of South Carolina. 1972-1973 Annual Report (105th).
INSTITUTION South Carolina State Dept. of Education, Columbia.
PUB DATE 73
NOTE 347p.
EDRS PRICE MF-\$0.75 HC-\$16.20 PLUS POSTAGE.
DESCRIPTORS Educational Finance; *Educational Programs; Elementary Schools; *Program Descriptions; *Program Evaluation; Secondary Schools; State Aid; State Boards of Education; State Departments of Education; State Legislation; *State Programs; *Statistical Data
IDENTIFIERS *South Carolina

ABSTRACT

This report is presented in three major sections: Instruction, Administration and Planning, and Finance and Operations. These sections provide general descriptions of the various programs. The greater part of the document is given over to a presentation of appropriate statistical tables and charts and financial breakdowns in a separate section. (JF)

STATE SUPERINTENDENT OF EDUCATION PROGRESS REPORT 1972-73

South Carolina's 105th public school year may be marked by historians as one of measurable progress for educational programs.

Major resources within the State Department of Education and many school districts were concentrated on achieving established, long-range objectives. An evaluation of 1972-73 activities indicates progress is generally on schedule in this historic, goal-oriented effort to meet the most pressing needs of public education in South Carolina. The second-year results of our five-year plan for school progress placed us ahead of schedule in reducing the rates of first grade failures and dropouts, and increasing enrollments in special programs for the handicapped, adult education, state-supported kindergartens, and vocational training. Our schools also exceeded second-year goals for reducing the number of children scoring in the lowest national quartile on basic skills tests.

The State Board of Education's 1967 statement of educational philosophy has been translated into numerous program developments. The five-year plan for measurable progress in public schools is being updated annually. In February, 1973, the State Board of Education adopted the Defined Minimum Program combining previous state standards for elementary and secondary schools into a minimum program document.

The State Board of Education directed the State Department of Education to develop several alternative models for public school financing. The State Superintendent of Education established an Advisory Council on Equitable School Financing, consisting of state legislative leaders and other state officials.

The 1973 General Assembly increased state appropriations for teachers' salaries, supervision, school maintenance, and expansion of state kindergartens and vocational programs. About 85 per cent of our public school enrollment was covered by the compulsory school attendance law, which becomes mandatory statewide on July 1, 1974. All school districts submitted approved plans for providing appropriate education programs for all handicapped children, as required by the 1972 General Assembly.

The State Department of Education expanded drug-alcohol educa-

tion efforts by forming a Substance Abuse Unit and assembling material for a comprehensive health education program from kindergarten through the 12th grade. Three school districts received competitive grants for planning model programs for gifted and talented students. Two districts, Spartanburg and Rock Hill, moved toward establishing quinmester year-round school programs in secondary schools during the fall of 1973.

Individually Guided Education programs expanded to 47 schools, and a pilot program in Career Education continued at Batesburg-Leesville. "Project Succeed," an adjunct educational program designed to serve dropout-prone students, continued expanding and served 9,000 students in 120 high schools during 1973.

The State Board of Education adopted general recommendations from a 37-member Study Committee for revising the state's teacher certification program. Major recommendations included continued use of the National Teacher Examinations or a similar instrument for initial certification, and discontinuing use of the NTE as one of several factors in determining teacher salaries. The study also recommended using National Standards for State Approval of Teacher Education in approving teacher training programs.

The State Department of Education also established a new educational personnel information service, designed to provide districts and individual teachers accurate and timely information about employment opportunities.

The Department staff assisted districts in using student test data for local program improvements. A series of meetings was held to help district authorities interpret data from statewide test results, assess local educational priorities, and plan more effective instructional programs.

The Department also established a new dropout reporting system, maintaining computerized files on every student who quits school before graduation or fails to transfer to another school. Individual dropout reports were compiled and analyzed for individual schools, giving each school a profile of any problems that contribute to the dropout rate.

South Carolina schools also drew heavily on the State Department of Education's Research Information Unit, an information system that channeled sophisticated research data into districts for local problem-solving. Three innovative programs in South Carolina received "Educational Pacesetter Awards" from the National Advisory Council on Supplementary Centers and Services. An "Ed Fair '73" was held to exhibit 14 innovative programs with potential for meeting needs in other school districts.

All South Carolina school districts continued to operate unitary, or

racially integrated, school systems. The State Department of Education provided educational programs for 1,200 children of migrant farm workers and participated in a computerized records system for managing and maintaining school records of the migrant children.

The State Department of Education continued developing one of the most extensive and sophisticated instructional television systems in the nation. In 1972-73, a total of 806 public schools used ITV programs, with 215,477 individual students being served.

Progress is a relative term. We have signs on all sides that ours is an Age of Educational Realism. Our public schools are responding to strong and wholesome indications that citizens are no longer willing to accept any uncharted or unplanned course that could condemn our children to educational mediocrity.

This annual report deserves a closer look. After all, it is costing South Carolina taxpayers more than \$237 million, which was the total state appropriations for public schools in 1972-73.

Our public schools deserve a closer look from all of us, whether you are the parent of a child with a reading problem in Pickens County or a Charleston businessman who recognizes that our economic progress is directly geared to educational progress.

Look closely inside. I believe you will find a program based on a realistic assessment of priorities and necessities for South Carolina's educational and economic advancement. It is your program, a profile for the continuing progress of every citizen of a proud state.

INSTRUCTION

GENERAL EDUCATION

The Office of General Education has expanded during the 1972-73 school year to include Adjunct Education and Leadership Development.

Adjunct Education has developed and implemented "Project Succeed" for students who have experienced learning difficulties. This program is a coordinated general education-vocational instruction approach that has proved to be highly successful for over 8,000 students in 120 schools.

The Leadership Development Center was established in January 1973. Three planning coordinators are specially trained to assist school district administrative leadership to develop their skills in comprehensive planning and management. A conference room and training center were established where superintendents and leaders of seven school districts spent one or two weeks in concentrated training in development of comprehensive district five-year operational plans. These services are available to 20 districts per year.

Additional expansion of services has been achieved through the addition of a social studies consultant for secondary grades, a health education consultant, a child development specialist, and a coordinator for extended school year programs.

Drug and alcohol education consultants have been reorganized to form a Substance Abuse Unit. This Unit has developed a comprehensive substance abuse program for grades 1-12 that will be tested in 15 school districts during the 1973-74 school year. Teachers, counselors, administrators, college personnel and specialists in South Carolina and other states have collaborated in developing guides and training teachers and district coordinators.

A comprehensive study of office services and methods of their delivery to school districts resulted in a new system coordinating services of each section and unit. This system will eliminate duplication of services and designate services to the areas of greatest need.

All sections and units have major responsibilities in the continued development and implementation of the Five-Year Plan for Educational Improvement. Six of the 11 Task Force Committees are chaired by personnel from the Office of General Education.

Major legislation passed made it possible to expand efforts in substance abuse education, child development centers, and statewide kindergarten programs.

A legislative appropriation also made possible a cooperative agreement with the Technical Education Commission to provide the American College Testing program especially designed to identify career potential. These tests will be given to all eleventh grade students and a sampling of twelfth grade students. The information gained from individual students and statewide profiles will be of great assistance in the proper guidance of students into vocational and technical education programs.

Consultants served as chairmen of textbook evaluating and rating committees as the State Board of Education adopted new text materials in French, Spanish, Latin, German, elementary and secondary mathematics, business education, physical education, first aid, and various areas of vocational education.

The Office of General Education assumed major responsibility for the development of the Defined Minimum Program for school districts, which should prove to be a significant factor in improving the state's educational system. This program mandates the accreditation of all elementary schools and established minimum standards for all educational units from kindergarten through adult education, based on local needs. Criteria are also set for boards of trustees, central office staff, and operations.

Ten school districts have volunteered to serve as pilot districts in 1973-74 for the minimum program. The new criteria becomes effective for all school districts on July 1, 1974. The program requires comprehensive local planning and program development and allows greater flexibility for adapting programs to community needs. It also permits school district personnel to develop a contract for operations that may vary from required criteria, provided they can show that better programs will result. The contract is subject to approval by the State Board of Education.

In addition to continuing present services of training, consultations and program planning, development and evaluation, activities planned for 1973-74 include:

1. to identify and develop instructional programs and techniques to improve student performance,
2. to develop a comprehensive health education program for grades K-12,
3. to develop an emergency preparedness program primarily designed for grade 9,
4. to assist ten pilot school districts in implementation of the Defined Minimum Program and provide a monitoring service in preparation for statewide implementation, and
5. to provide concentrated services to 20 selected school districts.

Project Succeed

Major responsibility is developing a relevant program of education for underachieving, noncollege-bound high school students who are potential dropouts.

The program involves students in meaningful academic and vocational experiences and is open to all high schools in the state. Approximately 20 of the 420 students who began the program three years ago graduated from high school this summer.

The program has grown from ten schools with 420 students to 120 schools with 8,373 students enrolled.

Final reports for the year from the schools show the following percentages of grades earned by the students:

	A	B	C	D	F
English	6.0	30.6	44.6	15.3	3.5
Math	6.0	23.5	40.0	25.5	5.0
Social Studies	6.3	39.0	36.0	16.2	2.5
Science	3.5	24.0	45.5	20.5	6.5
Prevocational	4.0	26.6	48.4	16.7	4.3
Phys Ed	8.0	30.5	38.0	16.5	7.0
Electives	8.3	31.3	37.6	17.5	4.3

Only 3.8% of these students dropped out.

Components of the curriculum include four years of communication skills (English), two years of computation skills (mathematics), and one year of personal knowledge and human relations skills (civics, U.S. history and government), environmental skills (science), vocational exploration in grades 9 and 10, vocational specialization in grades 11 and 12. Elective subjects, based on students' interests and needs, are also offered.

Teachers' guides for English I and II were revised this year. The third level of government-citizenship studies on ITV was added for twelfth grade students.

Two-day workshops were conducted in the summer of 1972 in teaching methods and materials with 430 English, math, science and social studies teachers participating. Forty prevocational teachers attended an eight-day workshop.

The objectives and accomplishments of "Project Succeed" were explained in a statewide meeting for superintendents and directors of instruction, followed by two regional meetings for principals and counselors with 65 in attendance.

The number of schools participating during 1973-74 is expected to increase to 140.

Leadership Development Center

The Center, located at 1406 1/2 Gervais St., became operational in January 1973. Its major purpose is to develop and maintain long-range, performance-based planning in each South Carolina school district.

Officials of Barnwell District 19, Oconee County, Richland District 2, Orangeburg District 5 and Lee County completed two-week planning sessions. Officials of Florence District 4 (Timmonsville) and Dillon District 2 completed one-week planning sessions.

Center personnel also served as a "sounding board" for Department planning task forces to consider activities planned for fiscal 1973-74. The center staff is presently assisting in program input and course outline development for an ETV course entitled *Management in Education*.

The Center uses a management by objectives approach in assisting school district leaders to develop long range plans. This approach, which is new to most of the 93 school districts, will develop local school administrators' skills in planning, programming, coordinating, controlling and directing resources.

The Center plans to schedule and conduct two-week planning sessions for 21 school districts during 1973-74. The staff will also continue liaison and support to district leaders who have been through the planning process at the Center.

Elementary

Mission of the Elementary Section is to provide leadership to public school systems in early childhood, intermediate, and middle school education. Administration of early childhood programs and the accreditation program for all schools constitutes the legal responsibility of the section. Staff members also place special emphasis on leadership development, program guidance, and upgrading teacher competency.

Implementation of a state-supported kindergarten program for five-year-old children was continued under a five-year expansion plan adopted by the State Board of Education. The program began in 1969-70 when 6.5% of the eligible children were enrolled. In 1972-73 state funds amounting to \$1,650,000 made it possible to enroll 10,624 (21.39%) of the eligible children. The 1973 General Assembly appropriated \$3,150,000 for expansion of the program to serve 35% of the five-year-old population during the 1973-74 school year. Districts also use ESEA Title I funds to provide kindergarten programs for approximately 1,800 additional children.

Fifteen federally-funded child development programs sponsored by school districts were transferred from the Governor's Office Administration Division to the Department of Education in December 1972. The 1973 Legislature appropriated \$1,155,000 in state funds for

the operation of these centers from September 1, 1973, to June 30, 1974. Approximately 1,100 children ages 3-5 will be attending.

An additional 1,000 children ages 3-5 are being served by school-based programs funded through the Appalachian Regional Commission.

During the year, four regional workshops were conducted for all new kindergarten teachers and aides. Two state Early Childhood Education conferences for district consultants were held and five conferences were sponsored for elementary principals. Four regional workshops were conducted for principals on the use of the Learning Center Approach as a means of reducing failure in the first grade.

Consultants provided in-service training for kindergarten teachers in approximately 25 school districts in addition to routine visits to new kindergarten units.

Early Childhood Education, a guide for use by teachers and aides, and *Learning Centers: Children Alive*, to be used by teachers in grades 1, 2, and 3, were produced and distributed in 1972-73.

Follow Through programs in four school districts served 2,284 children.

A series of meetings for Follow Through directors, supervisors, parent coordinators, and chairmen of the Follow Through Parent Advisory Committees was held to share ideas and information, and to deal with common problems. Seven workshops for Follow Through parents were conducted.

The number of counselors in elementary and middle schools increased from 157 to 229 in 1972-73. Five districts have elementary guidance directors; 22 other districts have K-12 directors. These 256 counselors were divided into 10 groups for a series of work sessions with those in their own and nearby districts. This technique has proven an excellent opportunity for exchange of ideas for improving local guidance programs. One series of sessions was on "Model-Program Sharing." The second series was on "Use of Audiovisual Materials" or "Writing Behavioral Objectives."

Of 774 school librarians serving in elementary and middle schools, 602 are devoting full time to library services. The number who are properly certified is 648.

School collections of both print and nonprint materials have continued to improve in quality as well as quantity. The average number of books in elementary media centers is 13.3. All except 90 elementary schools and 20 middle schools met state standards of 10 or eight books per pupil as required.

A newsletter and bibliographies were distributed to media centers in school districts.

The educational process known as Individually Guided Education was introduced in South Carolina in 18 elementary and two middle schools in 1971-72. During the 1972-73 school year IGE expanded to seven middle schools and 37 elementary schools, involving approximately 19,500 children. The state facilitator continued to coordinate professional development of IGE activities and provide services designed to foster implementation in the 44 schools. Regional and statewide conferences and workshops were conducted for principals, unit leaders, teachers, librarians, guidance counselors, and special educators. Major events included a three-day IGE leadership institute, IGE librarians' seminar, materials exchanges, and an Individually Guided Motivation Awareness Conference. Three editions of the newsletter "League LinkIGE" were published and distributed to all professionals in the program.

Work was completed on the Defined Minimum Program for South Carolina School Districts adopted by the State Board of Education in February 1973. Statewide implementation is scheduled for July 1, 1974. The Elementary section staff members held 40 small group meetings to distribute and interpret the Defined Minimum Program to 750 principals and 165 district administrative personnel.

Twelve regional workshops were held in the fall of 1972 to assist local school administrative personnel in completing information required for the Department's Basic Educational Data System. Computerization of data was greatly expanded in order to avoid duplicate reporting from schools. The system also includes a computer analysis of data used in the accreditation process, thereby eliminating numerous man-hours previously required to determine quantitative deficiencies for schools.

The number of schools under the voluntary elementary and middle school accreditation program grew from 661 to 711, an increase from 81% to 87%.

The Department also supported the Southern Association of Colleges and Schools accreditation program through a cooperative agreement. At the 1972 annual meeting 288 schools were accredited, representing 34% of the state's elementary and middle schools.

Secondary Education

Mission of this section is to provide leadership, supervision, and consultative services to public secondary school staffs to insure the most effective program possible in utilizing available financial and human resources.

Accreditation of schools

During the 1972-73 school year, there were 298 public secondary schools (76 junior high and 222 senior high schools) in operation, compared to 305 secondary schools last year. The difference was the result of reorganization of ten schools as elementary schools and three as secondary schools, discontinuance of one school, and accreditation of one new consolidated school.

Approximately 325 principals and superintendents attended 12 fall regional conferences on accreditation standards procedures.

Computerized analysis of the secondary school accreditation data collected by the Basic Educational Data System, with a preliminary accreditation classification, was mailed to principals and superintendents of each school. Schools classified in the preliminary analysis as on *probation* had their physical facilities surveyed and curricula evaluated.

Below are comparative statistics of the accreditation classification of secondary schools.

<u>Classification</u>	<u>1971-72</u>	<u>1972-73</u>
All Clear	215	204
Advised	69	65
Warned	17	28
Probation	4	1
Dropped	0	0
Total	305	298

The revised accreditation standards prescribed by the Defined Minimum Program were explained to approximately 300 principals and superintendents in six regional conferences.

The staff also approved and monitored the following activities:

1. 115 experimental courses taught in 55 schools,
2. summer school sessions in 90 schools,
3. independent study courses for high school credit enrolling 139 students through the Division of Independent Study, University of South Carolina, and
4. state high school diplomas issued to 36,150 students and 3,189 adults from Sept. 1, 1972, through August 31, 1973.

Dropout Prevention

The second year state objective was to reduce the number of dropouts in grades 9-11 from 7,302 to 6,644 at the end of the school year. During the 1972 summer school session and the 1972-73 academic year, a reported 7,107 students in these grades dropped out.

Procedures for collecting accurate data as to numbers and characteristics of dropouts were continued. The highest incidence occurred at the tenth grade level, where there were 2,669 dropouts. Among 14 reasons listed, dislike of school was cited by teachers as the primary reason responsible for 2,181 dropping out of school.

The State Board of Education continued to designate dropout prevention programs as a priority for approval of Title I funds. Criteria and guidelines developed during 1971-72 for dropout prevention programs were used in the preparation and submission of Title I projects.

High school supervisors met with the principals of high schools experiencing a dropout rate of 5% or more of their total enrollment. They explained the characteristics of students who dropped out of school and assisted principals in evaluating courses offered to dropout-prone students. In-service training sessions for 350 teachers in eight such schools emphasized characteristics of dropouts from each school and recommended changes to reduce dropouts.

Approximately 350 administrators, directors of instruction, and counselors attended six regional conferences to review computerized data on dropout characteristics and the programs needed to reduce the number of dropouts.

The 1973-74 objective is to reduce the number of dropouts from 6,644 to 5,906.

Post-High School Enrollment

The second year state objective was to increase the percentage of students enrolling in post-high school educational programs to 60% of

those graduating from public high schools in 1972. An evaluation of the success of efforts in achieving the second year objective will be made from BEDS data collected during 1973-74.

Guidance consultants conducted six regional conferences for approximately 200 secondary school counselors to emphasize counselors' responsibilities for increasing post-high school enrollment.

A conference was held for college admissions personnel, schools of education deans, directors of guidance training programs, directors of technical education institutions, and members of the Higher Education Commission to seek their assistance in promoting post-high school enrollment; sixty-nine people participated.

The third year objective is to increase the percentage of high school graduates enrolling in post-high school education programs to 55%.

Audiovisual Services

Twenty-four workshops on audiovisual equipment operation, production of materials, and their utilization for effective communications were conducted for 1,225 teachers in 14 school districts. More than 625 requests for development of audiovisual presentations or supplies were received from Department personnel.

Guidance Services

Guidance consultants conducted 40 workshops to assist counselors in 10 districts in development of written comprehensive guidance programs. Consultative services will be provided for implementation of comprehensive guidance programs in 30 school districts during 1973-74.

In planning comprehensive guidance programs, administrators and counselors were encouraged to develop specific objectives, plan activities to achieve them, and adopt techniques for evaluating the success of the objectives.

Library Services

There were 400 librarians employed in the 298 secondary schools, 67 of whom were not properly certified, including nine head librarians. Two schools employed librarians serving less than the four periods daily required by accreditation standards. There were 105 secondary librarians employed ten or more months. Nine of the 13 male librarians were employed in secondary schools.

The average number of books per student in secondary media centers was 9.57. Only eight schools were evaluated as having an adequate

collection of printed materials. Total expenditure for materials, both print and nonprint, was \$772,905, or \$3.22 per student.

Under ESEA Title II, \$678,681.70 was spent for library materials; \$10,214.05 for periodicals; \$184,070.97 for audiovisual materials; and \$55,626.57 for processing.

Under ESEA Title I, \$207,770 available for library services provided employment for 57 librarians and 54 aides. Under ESEA Title III, \$33,100 was expended for a demonstration project in Greenville County. A reduction in federal funds resulted in a reduction of the 18 library supervisors employed in some school districts.

Two newsletters were published and distributed to librarians and media specialists. Special bibliographies on drug abuse, Negro history, and materials on South Carolina were included in the newsletters.

Approximately 200 librarians and teachers participated in the in-service training sessions conducted in four districts.

During 1973-74, the library consultant will give priority to school districts with a high percentage of students who are low achievers or dropouts.

Extended School Year

During the 1972-73 school year, city schools in Spartanburg, Rock Hill, and Greer developed plans for "quinmester" systems which included major curriculum revisions.

Printed materials on concepts of year-round school were disseminated to school administrators and other interested persons. Presentations were made to 25 professional and civic club meetings attended by approximately 1300 persons. The extent of studies made of extended school year was explained through interviews on a Columbia radio and television station.

During 1973-74, consultative services will be provided to 10 school districts that plan to implement extended school year programs. Instructional materials and activities developed by the three pioneer school districts will be utilized.

General Educational Development Services

The statewide High School Equivalency Certificate Examination was administered 70 times in 16 cities, including eight in the Department of Corrections, three in the State Hospital, and 34 special schedules for the blind, handicapped or those in emergency need. Of 2,900 people taking the exam, 1,669 qualified for the equivalency certificate.

Applications from military personnel and veterans who have taken

the tests through the United States Armed Forces Institute were also processed, and equivalency certificates were issued to 466 eligible persons.

Curriculum Development

The Curriculum Development section provided leadership, service, and planning for public education in South Carolina in diverse ways. In addition to workshops, in-service programs and personal assistance, consultants have provided teachers with materials, publications, and instructional aids, including ETV statewide coverage of important curriculum segments in various subject areas.

In conjunction with other Department staff members, the curriculum consultants have prepared and revised 1973-74 activities for improving basic skills, a major state objective. They also developed, reviewed, and evaluated various federally-funded projects and experimental curriculum programs; chaired textbook evaluation committees, and conducted "Project Succeed" workshops.

The consultants also worked on accreditation evaluation, facilities planning, and assisted ITV in its design, evaluation, and revision of instructional television resources. The staff also coordinated its services with federal and other state agencies having similar objectives. The curriculum consultants also attended state, regional, and national conferences and conventions in order to improve their professional competencies.

Consultants were added in health education and emergency preparedness education. Comprehensive programs will be developed in these areas during 1973-74 for implementation by school districts during 1974-75.

A primary objective for the immediate future is to develop a more efficient delivery system for all curriculum services on an interdisciplinary basis for all regions of the state.

Reading

The trend of reading instruction in South Carolina during the 1972-73 school year was toward individualization.

School districts were assisted by Department reading consultants in planning, identifying, developing, implementing, evaluating and maintaining effective reading programs to meet the individual needs of students in grades K-12.

South Carolina has Right-to-Read programs in Westminster Elementary School and three community centers in Greenwood, Ridgeville and Spartanburg. A status report on the Right to Read Program in South Carolina was developed for dissemination. Through the National Read-

ing Center's Right to Read Program, the South Carolina Volunteers in Reading has continued to expand.

Use of an extended readiness program for first graders, *Learning Through Language*, was expanded from nine pilot school districts to 37 school districts. Three regional three-day training sessions were held for district personnel, first grade teachers and aides who are using this material and periodic visits were made to these first grade classes.

A statewide workshop on *Reading Materials for Low Achievers* and six regional workshops on *Teaching Reading in the Secondary School* were conducted.

Supplementary reading materials made available by publishers were evaluated and placed in the Reading Resource Center in the Curriculum Section. An addendum to "A Pocketful of Reading Materials" was published and disseminated to district personnel. A new administrator's guide, "Building Elementary Reading Programs," was also distributed to elementary principals and district office personnel.

Services rendered to offices within the Department included providing information on reading to the Research Information Unit, previewing films for the State Film Library, and planning workshops with the Adult Education Office.

In recent years, the focus on reading instruction in South Carolina has been on remediation. Now there is a need to place a greater emphasis on preventive measures through individualized instruction encouraging continuous progress to assure that all South Carolinians will be functionally literate.

English

The English consultant served as chairman of the Basic Skills Task Force to develop yearly operational plans in the areas of reading, science, math, social studies, speaking, writing, and listening. He also served on the Cultural Arts Task Force in developing criteria in drama and literature. He coordinated the revision and implementation of the teachers' guides for the "Project Succeed" program and participated in the annual series of project workshops across the state.

Exemplary English programs which were eligible for exportability throughout the state were assessed and selected. The Office of Teacher Certification was assisted on English education programs, and the Audiovisual Library assisted in the evaluation and selection of language arts films for purchase.

The consultant also aided teachers planning the language arts component of the quinmester system in two districts and served on the Literary Arts Committee of the South Carolina Arts Commission and the Advisory Panel for the "Poets in the Schools" program. He participated

in the National Education Fair in Washington, D. C., as a representative of the State Department of Education and was appointed to the executive boards of the South Carolina Council of Teachers of English and the National Association of State English and Reading Supervisors.

Music Education

A trend toward greater diversification of music programs was evident in South Carolina this year particularly in the middle and high schools. To meet the diversified interests and needs of students, courses in guitar, recorder, and piano have been added to the curriculum of many schools.

A Greenville middle school has electronic keyboard and guitar laboratories. One Greenville high school offers an advanced music course for college credit. An Irmo elementary school provides individualized instruction through learning centers in music classrooms. Stringed instrument instruction in violin, viola, cello and bass are given in schools in Spartanburg, Greenville, Charleston, Anderson, Darlington, Florence and Columbia.

In conjunction with state reading consultants, the music consultant participated in six statewide workshops which emphasized the role of music instruction in developing reading readiness skills.

A new guide, "Music in the Middle School," was published and 16 regional conferences were held to introduce it to administrators and teachers. This guide is one of the first for adolescents and has attracted national recognition.

The music consultant worked with the Office of Teacher Certification and a committee of music educators in re-evaluating teacher certification requirements in music.

Assistance was provided to local districts in establishing arts committees, planning, developing and implementing programs, and providing in-service education programs for teachers.

Work with other agencies and organizations with similar aims included the South Carolina Arts Commission, the South Carolina Music Educators Association board, the state and national Music Educators National Conference, and North Carolina and Georgia departments of Education.

There is an increased awareness that music education is an integral part of the curriculum, both for its own sake and for the enrichment which it can give to other disciplines. School districts must recognize that an organized, sequential, and meaningful program requires an adequate, well-qualified staff.

Traffic Safety

The goal of traffic safety education is to reduce the tragic loss of lives and property resulting from traffic accidents by providing students the necessary information and skills to prevent accidents.

Driver education courses were completed by 19,828 students in 237 junior and senior high schools, an increase of 1,400 students over the preceding year. School districts were reimbursed a total of \$594,840 in state appropriated funds, based on \$30 per student. Over 1,600 adults received driver education courses. South Carolina automobile dealers provided 316 "free loan" automobiles with a retail value of approximately \$1,580,000.

In the coming school year, the Automobile Dealer's Association will sponsor awards in five school districts for graduating seniors with violation-free driving records.

In cooperation with the Governor's Highway Safety Program Coordinator, the four-year Highway Safety Comprehensive Plan was prepared. Among other projects, it provides for a model driver education facility in each of ten planning regions of the state.

During the past year, two driving simulators were obtained through federal funds totaling \$68,200. Projects were continued to improve traffic safety teacher training at the University of South Carolina and South Carolina State College with \$54,775 federal funds. School bus safety projects in ten school districts reflected a 4% decrease in accident rates.

Students participated in the National Safety Honor Roll, the Annual Southern Safety Conference, and the South Carolina Youth Safety Conference. Curriculum consultants assisted in teacher training courses at three private colleges and two state institutions, presenting traffic safety education courses.

A proposed new federal standard for traffic safety education has been published by the National Highway Safety Administration. If and when officially promulgated, this will require each state school system to present a K-12 traffic safety education program to include safety for pedestrians, bicycle riders, school bus riders, motorcycle riders and vehicle drivers and passengers. Failure to comply could result in \$15,000,000 per year in highway funds being withheld from the State of South Carolina.

The Occupational Safety and Health Act passed in 1971 is already having vast impact in the industrial, commercial, agricultural, and governmental areas, local, state, and federal. Education in the implementation and effects of this legislation is extremely desirable, if not imperative, for future employees and employers, particularly students who seek employment immediately following high school.

Physical Education

"As we learn to move, so we move to learn" is the new emphasis for physical education. More specialists have been employed in elementary schools and more para-professionals, college students and other teacher aides have been effectively used.

More high school students are taking physical education as an elective because of increased coeducational courses in lifetime sports and leisure-time activities.

In-service education programs for teachers were conducted in 18 school districts. Ten statewide elementary physical education conferences were attended by 496 representatives of 285 schools. Evaluation forms of participants suggest that conferences for 1973-74 should emphasize home-made equipment and supplies, rhythms, trends and innovations.

Assistance was given to two school districts planning year-round physical education programs. Leadership was provided in five reading workshops and ten drug education workshops.

Three Demonstration Center schools were selected under guidelines of the President's Council on Physical Fitness and Sports: Archer Elementary School, Charleston; O. P. Earle Elementary School, Landrum; and Woodruff Junior High School.

The physical education consultant represented the Department on four statewide committees of professional organizations. He also served as a member of the Department's Task Force on *Ready! Set. . . Go!*, an elementary physical education television series of 30 lessons, for grades K-2, made available to all schools. An estimated 17,000 children received the program, which stresses perceptual-motor skills, movement, expression and coordination. Level Two of *Ready! Set. . . Go!* is being proposed to ITV for 1973-74.

Mathematics

As early as kindergarten, some South Carolina public schools have initiated instruction on using the metric system of measurement. During 1973-74, mathematics and science consultants will conduct regional workshops to provide school leaders with the skills and knowledge necessary to assist teachers as they make the transition to the metric system.

Giving emphasis to individualized instruction, consultants helped implement the Developing Mathematical Processes (DMP) program field-tested in seven districts by approximately 1,100 primary pupils. An additional 35,000 elementary and middle school students are involved in the Individualized Mathematics System (IMS). Another in-

novation is an elective, Advanced General Mathematics, in the curriculum of 68 secondary schools for juniors and seniors aspiring for technical and industrial careers.

In promoting relevant mathematics programs for all students, the two mathematics consultants participated in two statewide conferences of South Carolina mathematics teachers, two Individually Guided Education seminars, and three school administrators' conferences. The consultants also chaired the program and workshop committees of the regional National Council of Teachers of Mathematics meeting in Charleston in April resulting in extensive in-service opportunities for approximately 900 participating teachers. One consultant was also chairman of the Center for Individualized Instruction System Consortium, composed of three State Departments of Education and 15 Southeastern school districts.

During 1973-74, the improvement and individualization of mathematics instruction will continue as well as selection and implementation of remedial programs and specialized technical, computer, and advanced training.

Science

As the emphasis in science has changed from training scientists to scientific literacy for all citizens, schools are being encouraged to begin discovery-oriented studies, interdisciplinary courses, diverse mini-courses with greater options for students to choose, and individualized instruction. Assistance has been provided to school districts that are developing modules for quinquenniums. A biannual newsletter has been sent out to all schools, informing teachers of current trends and activities.

The science consultant also worked with the Junior Academy of Science, the Science and Humanities Symposium, the West Virginia Science Camp and science fairs which provide opportunities for talented science students.

Science Education K-12, Administrator's Planning Guide was published and distributed to principals and curriculum specialists. Conferences were conducted to acquaint district representatives with the guide and an informal survey of science programs was begun, using the evaluative instruments in the guide.

The science consultant assisted with planning for a pilot science program for middle school children at Gibbes Middle School, starting in fall 1973. This is one of nine test sites in the nation and the only test site in the Southeast for *Human Science*, a three-year program being developed by the Biological Sciences Curriculum Study, pioneered last year at Lugoff-Elgin Middle School.

Presentations and demonstrations were made at environmental education institutes, using *People and Their Environment* publications, written by South Carolina teachers. Additional workshop materials are being designed to assist teachers in using the outdoors for developing basic skills.

Clover's lab science program won a national Education Pacesetter's award for creativity and innovation, one of 106 in the U. S.

A list of performance objectives necessary for scientific literacy is being compiled. This will provide a basis for development of an instrument to evaluate basic science education in the state.

Social Studies

Experimental programs and independent research in social studies relevant to students continue to gain popularity in South Carolina, enrolling 7,275 high school students during 1972-73. With initiation of quinmester programs at Greer, Rock Hill and Spartanburg high schools, this number will more than triple in 1973-74.

These experimental programs in Sumter, Richland, Kershaw, Greenville, Lancaster, Georgetown, McCormick, Marion and other counties include such topics as anthropology, local government, everyday economics, contemporary social issues, international relations, consumer economics, advanced South Carolina history, history of world religions, humanism old and new, famous American men and women, and Asian and African studies.

Social studies consultants also assisted in planning quins and mini-courses, usually nine weeks in duration, which allow greater flexibility to channel student interest. During the summer, consultants also reviewed and recommended modifications to some of 23 curriculum plans for high schools to be initiated in 1973-74.

Elementary schools initiated new materials for grades 1-8 using an international approach, such as broadening primary studies of homes, communities and cultures to those of other lands around the world. Workshops were held for 489 teachers using this new approach.

The ITV series of 57 lessons on U. S. history was revised with 20 new lessons and the sixth grade ITV course on Old World lands was also revised. Consultants also emphasized Project 18, a program for 18-year-olds voting for the first time in the November 1972 national and state elections. They also helped coordinate the William Randolph Hearst Foundation annual U. S. Senate youth program, Voice of Democracy contest, and various scholarship programs for high school students.

Of special significance was the Robert A. Taft Seminar on government and practical politics held for the first time in South Carolina, at

Clemson University, in June. The governor, state legislators and other state officials, congressmen, judges, editors, city managers, mayors and political party chairmen from the state spoke and answered questions on timely government operations for the 30 social studies teachers selected from 150 applicants. Social studies consultants worked closely with Clemson political science professors in planning the 10-day seminar, as well as with other college faculties planning seminars for social studies teachers.

Foreign Language

The emphasis in foreign language education during the year was upon experimental programs. Enrollment increased in the middle school exploratory programs, moving away from the former trend of offering courses for high school credit.

High school courses were developed which focus upon the student and his interests and capabilities rather than the subject alone. Included in this area were programs dealing with self-paced study, foreign language for the non-college bound student, and independent study. Travel-study trips to Europe for credit were conducted by several high schools.

Of particular significance for the future has been preparation of suitable courses for pilot extended school year programs. Leadership was provided in working with various teacher-training institutions throughout the state on current methods, emphases, trends, and needs of foreign language instruction.

Enrollment in Spanish continues to grow and should overtake French in South Carolina in the near future, following a national trend in the popularity of Spanish. Each year, German is added to some high schools in the state.

Future needs include upgrading teacher certification requirements, changing instruction from traditional focus on grammar and translation to studying the practical aspects of foreign language and culture, and wider use of filmstrips, films, and electronic classrooms.

Art Education

In recent years, there has been a resurgence of interest in the development of basic art education programs for all elementary students rather than only specialized electives in high school. This trend is exhibited by recent additions of art specialists to elementary and middle schools and special art facilities at new elementary schools. To support this effort, the Five-Year Educational Plan Task Force committee is developing activities, procedures and materials that will assure that all

South Carolina students will have basic knowledges, skills and aesthetic understandings in the visual arts.

Fundamental guidelines were published in the *Administrator's Handbook for Art Education* distributed for superintendents, principals, curriculum directors, and department chairmen. Sixteen regional seminars were conducted to familiarize administrators with the handbook, which has been circulated to other states and several foreign countries.

Elementary accreditation standards were revised in the *Defined Minimum Program* strengthening the development of elementary art programs.

A new art instructional ITV program was added for grades 4-6. *Art Spectrum*, a 30-minute monthly in-service series, was planned and conducted for teachers by the art consultant.

To familiarize district arts supervisors and college arts personnel with federal assistance, two statewide meetings were held with representatives from the Arts and Humanities staff of the Department of Health, Education and Welfare. Arts personnel of North Carolina and Georgia Education departments met with music and art consultants.

K-12 art committees were formed in ten school districts which were without art supervisors. These districts then developed program models, guidelines, exhibits, teacher workshops, and public awareness programs concerning the role of art in education, based on local interests. Art education films were recommended for the State Film Library, and the Research Information Unit was assisted on requests for information concerning art education.

Substance Abuse

During the 1972-73 school year, the Substance Abuse Unit was created combining drug education with tobacco and alcohol education and a coordinator was appointed. The unit assisted local school districts in planning and implementing a substance abuse program based on community needs.

To give teachers, administrators, and students more knowledge of the drug problem and tools to fight it, four one-week workshops were conducted, involving 185 teachers and administrators and 25 students. To implement the "Youth Strikes Back at Drugs" program, five workshops were conducted for 525 student council members and their faculty advisors. Ten two-day workshops involving 267 health and physical education teachers for grades 6-9, and nine in-service training programs involving approximately 1,000 teachers, were also conducted.

Instructional television programs, "Because We Care" and "Nobody But Yourself," were televised during the 1972-73 school year and continued into the fall semester.

Major emphasis was given to development of a Substance Abuse Educational Program for South Carolina. Programs successfully used in West Virginia and Ohio have been adopted for grades 1-8 by local teachers, counselors, and other school and college personnel.

A draft of a guidance-oriented handbook for grades 9-12 was developed and will be tested in 15 pilot school districts during 1973-74. Approximately 10,000 teachers and 280,000 students will be involved in this program. Detailed analyses and evaluations will be conducted to revise and update these programs as needed.

The 15 pilot districts are Florence #1, Marion #1, Richland #1, Newberry, Sumter #2, Sumter #17, Oconee, Marlboro, Spartanburg #7, Pickens, Lancaster, York #3, Charleston, Aiken and Greenville.

For the second year, the South Carolina General Assembly has appropriated \$150,000 for an effective development and implementation of substance abuse education. Working cooperatively with the Commission on Narcotics and Controlled Substances, the Commission on Alcoholism, and school district personnel, an effective program of education and prevention is anticipated.

PROGRAMS FOR THE HANDICAPPED

The number of handicapped children served has shown marked growth during 1972-73. While the increase in number of appropriate educational programs has been significant, additional programs must be developed to serve the educational needs of all handicapped pupils, as mandated by the Legislature in 1972.

During the year, planning was emphasized as a prerequisite to implementation of expanded programs during 1973-74 and future years.

Significant planning activities include the development of *Standards and Procedures for Implementing the Provisions of Act No. 977 of 1972 to Establish a Mandatory Program of Education of Handicapped Children in the Public Schools* which were approved by the State Board of Education on January 12, 1973. This document describes general policies and criteria for identification and evaluation of handicapped pupils, program design and implementation, qualifications of teaching personnel and provisions of adequate facilities and resources.

A variety of program models were developed and disseminated to assist districts in designing classes to meet the unique needs of children manifesting various handicapping conditions. Initiating of these models for children formerly receiving no special services was the top priority for using federal funds earmarked for the handicapped. Twenty-two projects were initiated to serve 4,346 handicapped children. Federal funds also supported a three-week summer program in Columbia for 12 deaf-blind children.

In compliance with Act No. 977, each district submitted an annual report on their current programs for the handicapped and plans for additional ones. An *Administrator's Guide to Programs for the Speech Handicapped* was distributed to help districts.

An amendment to the State Aid Law in June 1972 permits more flexible program planning by allowing state aid for teachers of moderately handicapped children who can benefit from part-time placement in regular classrooms.

The State Board of Education approved an increase from two to three hours of instruction per week for children who are confined to the home or hospital. Concurrently, payment to teachers of these children were standardized at the rate of \$8 per hour rather than being based solely on the teacher's level of certification.

The education of handicapped children is a high cost program. Costly psychological services, unusual teaching materials and equipment, and supportive services are necessary. The Department of Education reimbursed districts a total of \$110,000 to help defray these extra

Office of Programs for the Handicapped

* Based on district annual reports

costs, prorated at 41.6% of eligible expenses for programs for the emotionally handicapped.

Efforts to develop high quality programs for handicapped children included 39 workshops conducted for approximately 579 participants throughout the state. These workshops focused on instruction of children with visual, hearing, or speech handicaps, language development, counseling of parents of deaf-blind children, instructional methods, and learning materials made by teachers.

Five associate materials centers for the handicapped were established at Florence, Greenwood, Greenville, Lancaster and Beaufort. They will provide both personal and material resources to teachers of handicapped children and ultimately lead to better instructional modes.

In an effort to increase the number of well-trained teachers of handicapped children within the state, two federally funded programs were administered. Forty persons were enrolled in a 15-month training program funded through the Education Profession Development Act to earn a maximum of 24 hours of college credit toward certification in education of the handicapped. All of these trainees were employed full-time in the public schools as full-time teachers of the handicapped this year. The second program, funded under the Education of Handicapped Act, enabled 98 public school teachers to attend summer school and earn a maximum of six hours of college credit in education of the handicapped. Two of these were awarded full-time graduate fellowships in education of the handicapped.

As this was primarily a year of planning, next year must be one of implementation and accountability. Procedures must be developed for providing education for children for whom no program is available within the state or within a school district. Lines of responsibility for children housed in non-public school facilities must be established.

Means of transporting handicapped children unable to ride regular school buses must be developed.

Teacher competencies and subsequent certification must be analyzed further to provide quality instructional programs. Knowledgeable administrators of programs for the handicapped must be acquired within districts to ensure more effective comprehensive programs.

A program model involving vocational training for the handicapped should be developed to open new avenues for employment for this segment of our populace.

Only through prudent planning, careful implementation, and critical evaluation will South Carolina's handicapped school children attain their birthright.

INSTRUCTIONAL TELEVISION

Mission: The Office of ITV is charged with the responsibility of development, acquisition, scheduling and utilization of televised resources for teachers and students, both young and adult.

Ten regional advisory councils met three times during the year. The chairman of each regional council, 10 members-at-large, and the Department of Education staff members formed a 32-member ITV State Advisory Committee which met three times during the year. A Curriculum Coordinating Committee within the Department provided liaison and advice to help achieve consistent state instruction.

Publications

A resource catalog containing information on all televised offerings for the school year was distributed to every South Carolina teacher and administrator. A publication entitled, "Summer Fare," provided teachers and the public with information about 10 weeks of summer broadcasting. The "ITV Newsletter," published three times a year, was distributed to all teachers and administrators. The "ETV Evening Guide" and an afternoon teacher in-service training schedule were issued monthly.

As for the last six years, ITV sponsored a two-day statewide workshop to provide the latest in media information and techniques. Over 125 ITV building coordinators attended.

Resource Development Section

During the 1972-73 school year the Resource Development Section Staff visited 35 classrooms to observe use of TV resources and conducted 10 workshops.

Six television series were added to the 1972-73 schedule, now making available 64 series. These 64 series contain 2,826 individual lessons or programs representing a total of 1,069 hours of instructional television input into South Carolina schools. This is the most comprehensive instructional television program broadcast by any state ETV network in the country.

Two of the series were produced by the Office of ITV:

Psychology 101, 69 half-hour lessons, carrying three hours of undergraduate credit, was offered as a pilot project in four high schools. The course was taught by Dr. Richard A. Kasschau, University of South Carolina professor of psychology to 50 students.

The second course, *The Learner, His Environment and the Teacher*, was developed by Dr. A. Porter McLaurin. Both LET I and II were

BEST COPY AVAILABLE

offered at University of South Carolina regional campuses and other localities. As of June 30, 1973, 737 teachers had successfully completed these courses.

Four series were acquired from TV libraries:

The Electric Company designed to teach basic reading skills to children, grades 2-4, enrolled 39,319 pupils.

A Matter of Fiction, presenting books for enjoyment and leisure reading enrolled 4,651 junior high school students.

Why, current events series, enrolled 2,058 high school students.

Ready? Set . . . Go!, a physical education series for first graders, had 8,091 enrolled.

The Resource Development Section also continued production on *Getting the Word*, a ninth grade remedial reading series viewed by 11,247 students; *Time For Sounds V*, an elementary music series viewed by 6,199; and three new series in health education, geometry and South Carolina.

All new series were evaluated in June 1973, by committees of 30 teachers who had utilized these series in the classroom. These evaluations serve as a basis for revision of the series.

Utilization Section

To obtain improved classroom use of televised resources, field offices are located in Charleston, Greenville, Florence, Aiken and Rock Hill.

Total schools visited	590
Total visits made to schools and administrative offices	1,163
Number of in-service sessions	156
Number of teachers attending in-service sessions	4,120
Number of administrative conferences	29
Number of college classroom in-service sessions	9
Number of civic groups and other non-school groups spoken to	9
Number of superintendents visited	78

UTILIZATION SUMMARY

Public Schools

Year	Schools Using	Individual Students	ITV Enrollment*	Individual Teachers	Classes	TV Sets
1971-72	655	165,745	510,914	5,658	18,030	7,208
1972-73	806	215,477	608,991	5,729	24,406	7,930

Private Schools

1972-73	19	2,212	7,764	74	307	72
---------	----	-------	-------	----	-----	----

*Total ITV enrollment is obtained by counting each student each time he uses a different ITV resource.

TEACHER TRAINING:

1. "Turned-On Education" workshops for 227 new administrators, ITV building coordinators, and new teachers on new ITV resources, learning by technology and problem solving through group dynamics.
2. ITV Media Management for 126 ITV building coordinators.
3. Spanish Teacher (ITV Series) attended by 60 teachers in four areas.
4. Extended School Year for 105 Rock Hill administrators and writers of 45-day courses.

In-Service Programming By TV

Each day from 3:15-4:30 in-service programs related to classroom series, series for certification or college credit or programs of special interest are scheduled. Several offices used telephone talk-back facilities for training personnel.

ITV began its telecast school year with an eight-day preview and in-service week in August. Schedule of daily in-service programs are sent each month to all principals, September-May.

During 1972-73 ITV provided 105 hours of open-circuit and 182 hours of closed-circuit programs for teacher training. These programs were:

Series:

	<i>No. in Series</i>	<i>Length</i>
The Communists	9	30 min.
Time for Sounds (Music)	8	30 min.
Art Spectrum	8	30 min.
Teaching of Elem. Mathematics (Certification)	17	45 min.
LET I (USC Credit)	15	30 min.
LET II (USC Credit)	16	30 min.
Education 555 (USC)	15	2 hours
Drug Education (USC)	15	2 hours

Single Program Specials:

	<i>Length</i>	<i>No. of Times Telecast</i>

Happiness Is Literacy	60	9
Open Education	60	7
Adlerian Counseling Theory	30	9
Childhood Learning Dis-		
abilities	30	3
School Bus Safety	20	3
Elementary Education Specials	15-30	10
Welcome Back to School	15	7
ITV - The Fourth Network	20	3

VOCATIONAL EDUCATION

The mission of the State Office of Vocational Education is "to plan and implement educational programs and objectives designed to prepare each vocational student for constructive participation in society, immediate employment, or further education, and continued self development." Staff members assist local administrators in initiating, expanding and evaluating programs, planning classrooms, and training teachers.

Trends

The past decade has been marked by more progress in vocational education in South Carolina than any other period in its 55-year history.

New and expanded industries in South Carolina increased the number of employees in non-agricultural occupations from 882,400 in 1972 to 928,700 in 1973, a 5.2% increase. This has had a marked influence on enrollment in vocational programs.

Vocational education programs reached more than 110,000 secondary students and adults in 202 high schools and 33 modern area vocational centers. More than 93,000 were secondary students enrolled in occupational or prevocational offerings, with the balance, almost 17,000 adults in occupational courses.

Trade and industrial experienced the greatest gains with a 21.6% increase in secondary enrollment to 16,248 and a 17% increase in adult enrollment to 7,662. Home economics showed a 16.4% increase in total enrollment to 39,349. Distributive education had a 9.4% increase in secondary enrollment to 4,857.

The past year marked the opening of four new vocational education centers: Calhoun-Orangeburg (Orangeburg); Foothills (Taylors); Strom Thurmond (Edgefield); and H. B. Swofford (Inman). These openings brought to 33 the number of centers in operation, while construction began on another nine centers set to open this fall. Thus, the outlook remained promising for completing the state's proposed network of 63 vocational centers by 1975.

Each of the seven major service areas marked significant progress in curriculum guide development. In home economics education, the initial influx of semester and mini-courses vastly broadened the total program and spurred a notable increase in enrollment.

Use of four standardized achievement tests enabled agriculture teachers to determine the academic progress of their students. A comprehensive curriculum in distributive education was purchased from an 11-state consortium. It deals with 69 of the 82 occupations of marketing

and distribution. These materials were written in behavioral terms and arranged in learning/activity modules.

State/Federal Legislation

Action of the S. C. legislature in granting a pay raise to teachers had a healthy influence upon recruiting instructors for the state's vocational education system.

The State Board of Education moved in May 1973, to include consumer and homemaking education with occupational and prevocational education as part of the five-year objectives for South Carolina public schools. As a result, funding is available for 14 new home economics programs.

The Board also passed new certification regulations for health occupations instructors.

Trade and Industrial Education

Accomplishments and Results

Trade and industrial education programs increased this year to 490; an increase of 45 over 1971.

Local committees have been organized to advise on instruction presentation, placement of graduates, and follow-up evaluation of program effectiveness.

Publications

Instructional aids developed for electricity, machine shop, and auto mechanics will be distributed to the teachers in 1973.

Curriculum guides have been developed for industrial sewing, graphic communications, electricity, power mechanics, building construction, auto body and fender repair, welding, heating, electronics, and air conditioning and refrigeration. They are being field tested in classrooms and laboratories and will be evaluated by field survey. Revised curriculum guides will be distributed to the teachers by May 1974.

A guidance booklet on "Opportunities For Youth in Trade and Industries" is planned for distribution by March 1974.

Enrollment

Secondary enrollment grew from 13,367 to 16,248 in 1973, an increase of 21.6% over the preceding year. Adult enrollment increased from 6,557 to 7,662, an increase of 17%.

Teacher Training

During the summer of 1973, 22 graduates of technical education centers were recruited and given pre-service training to teach in vocational centers.

Conferences to upgrade teaching skills were held during the summer for automotive body and fender repair, diversified occupations, electricity, electronics, graphic communications, industrial sewing, plumbing and masonry.

Safety and technical training for 901 linesmen and other employees of electrical distribution system was conducted.

Agricultural Education

Accomplishments and Results

Development of course outlines and curriculum guides was initiated this year for each major course of study in agricultural education. Guides in *Turf and Lawn Management* and *Environmental and Natural Resources* were completed. Included in each guide are student objectives, learning activities, topic outlines and resources.

Agricultural education programs provide skill training for secondary students and adults who are employed or plan to pursue careers in agricultural production or agribusiness. A follow-up study revealed of 1972 graduates that of 1,707 persons available for placement, 1,232 were employed full time in agriculture or related fields.

Clemson University authorized for the first time off-campus graduate credit courses for teachers which were taught at Florence and Laurens.

Publications

1. *Operating the Knuckle-Boom Loader - A Student Training Manual and Instructors's Guide*, a step-by-step procedure in developing manual dexterity with loader controls and knowledge of loading techniques, hydraulic principles, and safety.

2. *Small Gasoline Engines - Float - Type Carburetor Repair - A Self Instructional Manual* to train students to disassemble, repair or replace worn parts, reassemble and adjust the float-type carburetor used on small gasoline engines.

3. *Practical Wiring Exercises*. Three self-instructional manuals designed to help the student learn to install circuits for lighting, water heaters, grounded receptacles, electric ranges, and freezers.

To revise the total agricultural education curriculum, preliminary drafts were prepared for curriculum guides in *Environmental and Natural Resources Occupations* and *Turf and Lawn Management*.

creasing competence in oxy-acetylene welding and were attended by 80 teachers. District consultants conducted 12 in-service conferences to distribute and explain new instructional materials, report forms, test information, follow-up of students, and evaluation. One state wide in-service conference was conducted at Clemson University. A total of 146 teachers attended.

Working in cooperation with Clemson University and the Employment Security Commission, the staff assisted in a nationwide study to prepare an industry/occupation matrix to be used in identifying the national scope of agribusiness manpower. Its purpose is to provide information on vocational counseling, current labor market information, and job placement, and direct employment to potential agribusiness manpower.

Future Farmers of America continued to conduct an effective leadership program. Activities included the state FFA convention at Clemson University, summer camping program at Cherry Grove, four chapter officers leadership conferences, and some 30 additional activities and awards programs. Members also participated in leadership conferences in regional and national FFA conventions.

Members of the S. C. Association of Young Farmers attended the State Young Farmers convention and awards program and the National Young Farmers Educational Institute at Sacramento. Chapter activities included farm and agribusiness tours, farm equipment field days, equipment auction sales, and special short courses.

Home Economics

Trends

The Vocational Education Amendments of 1968 expanded homemaking education to give greater emphasis to consumer education, to preparation for the dual role of homemaker and wage-earner, to programs relating to social and cultural conditions affecting families, and to needs of the disadvantaged and the handicapped.

Curriculum in the middle, junior and secondary schools of South Carolina was made more relevant to the developmental characteristics, interests and needs of youth of this grade span.

During 1972-73, a 16.4% expansion in enrollment resulted from instructional program, which included individualized instruction, and semester and mini courses. For student and teacher accountability, competencies were identified and progress charts developed for course offerings.

Future Homemakers of America provided an additional avenue for 6,750 members in 169 schools to develop leadership through projects in

Units of instruction for each course include behavioral objectives, suggested learning activities, a topic outline, and suggested resources.

Trends

Four standardized achievement tests in agricultural mechanics, ornamental horticulture, forestry, and sales and services were administered by teachers and scored at Clemson University. These tests enable each teacher to see how much progress his students make from the fall to the spring and compare the performance of his students and school with others throughout the state.

Eight new courses in environmental and natural resources occupations will be implemented during 1973-74. These courses will provide graduates to fill jobs in the new and expanding ecology-related occupations.

Four new courses in turf and lawn management will be implemented during 1973-74 to help fill positions in outdoor recreation and beautification.

Vocational agriculture was offered in 174 schools with 216 teachers. A total of 6,959 students were enrolled in pre-vocational exploratory agriculture and 4,571 students in agricultural production and agribusiness occupations. For the first time, the total enrollment in agribusiness was larger than in agricultural production.

<i>Course</i>	<i>Enrollment</i>
Agricultural Production	2205
Agricultural Mechanics	1403
Agricultural Sales and Services	27
Agricultural Products	20
Ornamental Horticulture	710
Pulpwood Harvesting	90
Forestry	192

Teachers provided instruction for 5,749 out-of-school young farmers and adults engaged in agricultural production and agribusiness occupations to upgrade skills or to teach new skills to meet technological changes taking place in the total agricultural industry.

Four in-service seminars were held at Clemson University, Winnsboro, Florence, and Walterboro on the current situation and future outlook for agriculture. A total of 96 teachers attended.

A six-week summer institute on methods of teaching agricultural mechanics and agricultural engineering was conducted for 15 teachers for six hours of graduate credit.

Five workshops in agricultural mechanics were conducted on in-

their family homes, schools and communities. The annual state convention in Columbia was attended by 458 delegates and teacher advisors and 25 delegates participated in the national FHA meeting in Los Angeles. Camping at the Mountain Rest FHA Camp attracted 190 members and 83 members attended a leadership training workshop.

Publications

1. Curriculum Guides: *Career Opportunities, Child Development, Clothing and Textiles, Consumer Education, Family Health, Family Life Education, Foods and Nutrition, Housing and Home Furnishings, Middle School, Expand Food Service, and Home Economics Cooperative Education.*
2. Bulletin: *Guideposts for Action*, a handbook for South Carolina Future Homemakers of America.
3. Brochures: *A Career in Food Service, Home Economics Cooperative Education, Your Future in Child Care Services, and Something for Nothing* - Information to alert consumers of flim-flam practices.
4. Transparencies: *Cost Control in Food Service.*
5. Slide-Tape Series: *Conservation of Electricity, Heating and Air-Conditioning the Home, and Mobile Homes.*
6. Periodicals: *Trim* - annotated bibliography of current teaching resources and instructional materials, published twice yearly; *Bridge* - quarterly publication of in-service opportunities and program innovations.

Enrollment

Student enrollments for home economics education:

Consumer and Homemaking Education	36,434
Middle and Junior High Schools	4,594
Secondary Schools	31,840
Comprehensive Year Courses	18,885
Semester Courses	12,955
Home Economics Gainful	1,444
Food Service	375
Child Care Services	948
Occupational Sewing	109
Hotel-Motel Services	12

Adult enrollments for home economics education:

Consumer and Homemaking	1,452
Home Economics - Gainful	19

Teacher Training Sessions

Use of new curriculum guides was featured at the annual vocational conference, attended by 350 teachers of consumer, homemaking and home economics education. Thirty-nine meetings for 586 teachers were conducted to discuss use of the curriculum guides and learning-resource centers for individualized instruction. Six in-service meetings and one seminar were held on student recruitment, work experiences, and resource materials for home economics occupations.

Office Occupations

Publications

The Full-Keyboard Adding Machine - student and teacher manuals.

The Ten-Key Adding Machine - student and teacher manuals.

Careers in Office Occupations - transparencies and script for recruiting students.

Duplicating Equipment - student and teacher manuals.

Curriculum Guide for Office Occupations - lists student objectives, topics, and evaluation procedures for courses.

Office Occupations in South Carolina - brochure listing the six majors: stenographic, clerical, accounting, senior intensified program, key-punch and data processing; requirements for completing each major, and a recommended list of equipment for the various programs.

Innovations

Nine high schools were selected to conduct an experimental typewriting program during the first semester of 1972-73, rather than the traditional two semesters.

Enrollment

Enrollment in all office occupations programs was 11,116, of whom 514 were male and 10,602 female. In the various majors, enrollments were: stenographic, 4,584; bookkeeping, 1,160; general clerical, 5,197; senior intensified program, 109; keypunch, 10; data processing, 56. Provocational enrollment was 305 and adult enrollment was 532.

A total of 227 students were trained cooperatively by teacher-coordinators and businessmen, including one group of disadvantaged and handicapped students.

Teacher Training Sessions

During the summer of 1972, courses in improvement of instruction

in typewriting and shorthand, and improvement of instruction in office machines, were conducted at Winthrop College for 50 teachers.

In the fall 29 statewide in-service meetings were held to distribute new instructional materials; impart new techniques and methods presented in EPDA institutes at Winthrop; and to discuss preparation of reports to 300 teachers and administrators.

Distributive Education

Trends

During the school year, 157 distributive education programs were offered in 73 high schools and eight vocational centers, an increase of 47 course offerings over 1971-72. Additional classes included eight for handicapped, one for disadvantaged, seven for special needs and nine cooperative programs under supervision.

Six school districts transferred distributive education classes from comprehensive high schools into new vocational centers to increase enrollment and make use of updated classroom facilities and equipment.

Nine new distributive education classes will be in operation during the 1973-74 school year in Beaufort, Estill, Clinton, Greenville, Hanahan, Kingstree, Loris, Edgefield, and Myrtle Beach.

As a result of a comprehensive evaluation audit, a totally new curriculum structure for distributive education was completed for implementation during 1974-75.

Membership in the Distributive Education Clubs of America (DECA) increased from 1,797 to 2,143 for school year 1972-73, or an increase of 346 members. During this same time, DECA membership increased from 60 to 70 high schools and both teacher training institutions in the state, the University of South Carolina and Winthrop College. More than 1,100 students participated in six leadership conferences.

State/Federal Legislation

The uncertainty as to continued federal funding of vocational education and the decrease in federal spending during this fiscal year has affected training to the student audience served.

State Board approval of defined minimum program standards for South Carolina schools, effective July 1, 1974, provides for expansion of distributive education. Nearly 60% of all those in the labor force are working in marketing and distribution occupations.

Publications

Distributive Education Curriculum Guide, revised after student and teacher evaluations.

Merchandising For Profit, Effective Buying and Selling Practices, 70-page curriculum guide.

Fashion Merchandising, a 100-page curriculum guide.

Distributive Education Bulletin Board Ideas, 25-page booklet.

Distributive Education, 15-minute, 80-slide tape presentation explaining the purpose, function and operation of a vocational distributive education program.

Handbook for Distributive Education Teachers, 58-page handbook on program operations, coordination techniques, DECA, program improvement, public relations and evaluation.

Innovations

A comprehensive curriculum was purchased from an eleven-state consortium dealing with 69 of the 82 occupations of marketing and distribution. These materials are written in behavioral terms and contain 488 learning activity modules, accompanied with tests, and materials for 983 competencies needed to perform at an acceptable business standard.

These curriculum materials are probably the most significant innovation in the field of distributive education in its 36-year history.

Enrollment

Secondary enrollment in distributive education grew from 4,439 to 4,857, an increase of 418 students or 9.4%. This includes 190 handicapped students, 59 disadvantaged, 412 with special needs, 494 in cooperative programs and 3,702 in regular classes.

Adult enrollment totaled 109 persons enrolled in six adult supplementary courses provided through the Clemson Area Continuing Education Center.

Teacher Training

Financed by a \$10,000 EPDA grant, a three-week Education Institute was held in June, 1973, at Winthrop College at which 19 teachers received three hours of college credit.

Health Occupations

Enrollment

Health Occupations programs offered to high school students and adults included courses for practical nursing, operating room technicians, dental assistants, health assistants, inhalation therapy technicians, supplementary pharmacology for licensed practical nurses, and adult programs for laymen and hospital personnel. Forty-two programs were conducted this year in 26 counties. Of those students who graduated in 1972, over 90% found employment in the health care field within three months of graduation. (Federal Follow-Up Report 3139-1971-72).

During the fiscal year, 2,217 students were enrolled in 125 health occupations programs. These figures represent 588 secondary and 417 post-secondary students in 42 full-time programs and 1,212 adults enrolled in 88 preparatory and supplementary programs. Included in these figures are 39 students enrolled under cooperative programs and 46 students enrolled in programs for the disadvantaged.

State/Federal Legislation

The certification of health occupations instructors approved by State Board of Education will provide a uniform basis for determining salary, and it will provide an incentive to health occupations instructors to upgrade their knowledge through continued in-service education. Beginning in 1974, all health occupations teachers will be certified.

Publications

Practical Nursing and Supplementary Pharmacology, curriculum guides, were prepared by South Carolina instructors of practical nursing, on behavioral objectives.

Trends

Each year more emphasis is being placed on providing people in health occupations with a greater degree of lateral and vertical mobility. For example, an LPN, once locked into a job with no opportunity for advancement, can today further her education to the associate or baccalaureate level. By successfully writing a challenge exam to prove her competency in the nursing skills, partial credit may be received for her practical nursing training. This method of providing for continued upgrading in skills and employability is not yet fully developed in all areas, but nurses and nursing educators are constantly working toward this goal.

Teacher Training

Four teacher training conferences were attended by approximately 90% of the health occupations instructors.

In June 1973, 20 instructors attended a one-week workshop at Clemson University to improve methods of course construction, teaching, and evaluation of student performance. Participants in the workshop received two hours of certification credit.

Special Programs

The Vocational Education Amendments of 1968 provide at least 10% of state allotments be used for the handicapped and 25% for the disadvantaged. Only services beyond those provided in regular programs can be considered *special services*.

Administrators'/Teachers' Guide was published to assist in planning disadvantaged and handicapped programs and in selecting eligible students.

Accomplishments and Results

South Carolina continued programs and initiated seven new special programs for 337 handicapped secondary students at no additional cost.

There were also 55 continuing programs and 11 new special education programs for 803 disadvantaged students at no additional cost.

An additional 19 new special vocational education programs for 1,269 disadvantaged secondary students were started in districts with a high incidence of dropouts and unemployment under funds carried over from the previous year. This makes a total of 39 such programs now in operation. Total enrollment was 10,312 with 6,797 handicapped and disadvantaged youth in prevocational programs and 3,515 in high school programs.

The annual workshop for the special program teachers at Clemson, August 7-10, provided teachers with the latest methods, techniques and trends in teaching students with special needs.

Research Coordinating Unit

"A Guide to Adult Education Programs in Area Vocational Centers" and "A Guide to Student Placement and Follow-up Programs in Area Vocational Centers" have recently been completed. The guides will be distributed to the vocational center directors and evaluated during the 1973-74 school year to determine their relevancy.

Phase II of the Graphic Communications Curriculum Development Project will be completed by August, 1973. The product will include 40

self-instructional slide/tape programs, 30 learning activity packages, and a revised curriculum guide with additional student assignment sheets included.

The concept of career education was initiated in Lexington District 3, serving the Batesburg-Lesville area, during the fall of 1972. The project was critiqued by two evaluation committees and funding has been approved for its continuation in 1973-74. The Duncan area in Spartanburg District #5 has been approved as the second Career Education Project site, beginning in the fall of 1973.

An initial deck of 120 microfilm Vital Information for Education and Work (VIEW) cards containing information for 100 jobs and 20 apprentice programs was developed, duplicated, and disseminated to 232 schools throughout the state. An expansion of 88 additional occupations will be completed by the fall of 1973. Occupations included have been selected on the basis of job demand, training availability, and student interest.

A statewide "Non-manufacturing Wage and Salary Survey" was completed in June by Dr. Richard E. Stanley and Associates to determine prevailing entry wage rates for 88 occupations in the revised VIEW deck.

Appalachian projects funded during the year were:

1. Improvement of adult programs at eight vocational centers to train adults for future job needs or upgrade their skill in their present jobs.

2. Student Placement Services Project commenced in July 1972, for the purpose of providing a more effective placement of vocational graduates into jobs related to their training.

3. The Guidance Institute Project was initiated to give counselors from middle, junior, and high schools a better understanding of the world of work.

4. The Career Cluster Analysis Planning Project represents the initial component of a three-phase effort that will result in the development of self-paced instructional packets and an articulate educational system for the vocational, technical, and adult education programs in particular course areas.

Custodial Training

Purpose of this office is to provide attractive, clean environment in which effective learning can take place in public schools by teaching custodians the skills and knowledge required for proper housekeeping, maintenance and protection of school buildings and grounds.

Custodial training included a three-hour course attended by 549.

Certificates were presented to 218 custodians who completed a 12-hour course in custodial operational procedures.

A course for 61 principals was aimed at effective management of school housekeeping personnel by increasing their understanding of building care methods and gaining the cooperation of teachers and students in maintaining school buildings, ground and equipment.

Recommendation for upgrading custodial programs were offered during visits to 98 schools in 21 districts.

The South Carolina School Custodian Handbook is being revised and a training filmstrip on care of resilient floors is being produced.

Trends in custodial training included the addition of 10 filmstrips with sound on various phases of school custodial work, a micromatic cassette projector, and slides for illustrations. Slides made in South Carolina schools help custodial personnel relate to similar conditions in their respective schools, and carry more impact in the effective learning of better methods of school housekeeping.

Facilities and Equipment

The staff explains to local administrators, architects and contractors state policies and procedures for the construction of area vocational education centers. The office also maintains an up-to-date inventory of all equipment bought for the state Office of Vocational Education in Columbia, district offices, counties and school districts.

Bond money was approved by the 1972-73 legislature for the building of vocational centers. In July, the State Board of Education approved federal funds for the building of four vocational centers in Darlington, Dorchester County, Lexington District #5 (Irmo), and York District #3 (Rock Hill).

The trend is to develop laboratories for vocational centers with a great degree of flexibility so that new programs can be introduced with the minimum of change.

Teacher Education

The teacher education unit certified 191 teachers to teach in the area vocational centers. Over 500 teachers were afforded in-service education opportunities at Clemson University, Winthrop College, South Carolina State College, the University of South Carolina and the State Department of Education. These included institutes for teachers of trade and industrial, counselors, home economics, data processing, business, bookkeeping and distributive education.

The teacher education office serves over 1,700 vocational teachers in 32 vocational centers.

Vocational Guidance

All counselors employed in the vocational centers have participated in training sessions on the utilization of the General Aptitude Test Battery and the *Dictionary of Occupational Titles*.

All 33 vocational centers and 30 high schools with vocational courses were visited to assist counselors in setting up guidance programs, including testing and selecting students for vocational classes.

Two recent reports by the South Carolina Employment Security Commission, *Industry Monographs on Manpower — Requirements and Resources in South Carolina, Special Report 1972*, and *Manpower Educational Requirements for Occupations in South Carolina, Special Report 1972*, were distributed to schools, superintendents, guidance counselors, and principals, area vocational centers, directors and vocational counselors.

"Vital Information for Education and Work," (VIEW), a micro-film career information system, was released to all schools.

A two-week South Carolina State College E.P.D.A. (Education Professions Development Act) Institute on "Occupational Information and Career Development" was attended by 30 counselors.

Information

Summer and fall editions of the magazine "Vocational Education in South Carolina" were distributed to more than 9,000 readers, including vocational education teachers, administrators, state legislators, and the general public.

Some 90 news releases on varying vocational education programs and services were distributed to all South Carolina daily newspapers, most weeklies and all TV stations. About half of these releases were accompanied by photographs.

A weekly television program entitled "Pathways to the Future," was aired each Saturday over a Columbia station.

Four 3 1/2-minute Emphasis Education radio tapes were aired over some 85 radio stations. Television spots on FFA week were sent to the 11 TV stations in the S. C. market area. Some 10 slide presentations were prepared to accompany speeches by staff members or as displays for public fairs.

A 12-page brochure, "Vocational Education in South Carolina . . . Moving Students to Careers," highlighted key program developments for 1971-72.

The editor made presentations for vocational counselors and 33 vocational center directors on basic techniques for print and broadcast media.

Vocational Education Media Center

The Vocational Education Media Center at Clemson produced over 43,000 volumes of new curricula or instructional materials totaling more than 3,000 pages. During 1972-73, 54 slide sets with audio tapes and 3,200 sets of transparencies were produced and distributed.

More than 22,000 volumes and 2,200 sets of transparencies were reprinted for use by vocational educators and students. There were also 122 jobs completed comprising almost 120,000 pages for use in teacher training programs.

The Media Center completed 251 different tasks comprising 82,000 volumes, some 5,400 transparency sets, and 340,000 pages and 527 illustrations, a total printing of over 5,000,000 pages.

The media center staff began or completed 15 curriculum guides, two textile textbooks, one forestry textbook, approximately 20 filmstrips, several self-instructional manuals and other instructional materials.

The media center acquired electronic typesetting equipment, offset platemaking equipment for the production of microfiche for the VIEW materials.

The staff participated in small group workshops with vocational teachers to develop instructional materials and in several state, regional and national workshops and conferences related to curriculum development.

ADULT EDUCATION

Direct services to school districts and other agencies include program planning, funding, budgeting, materials, teacher training, and evaluation for adult basic and secondary education programs.

Adult education enrollments reached an all-time high during the fiscal year, with 107,620 adults enrolled in educational programs — as compared to 96,845 reported enrollments during 1971-72. The rate of enrollment increase slowed somewhat, however, principally due to the fact that there had been no increase in appropriations to offset the inflationary trend of the state's economy.

Target population was 1,013,000 persons in South Carolina 16 years of age or older who are not in school and have not completed the twelfth grade, as reported in the 1970 census. Adult enrollments in 536 educational centers totaled 67,476, an increase of 3,918 from 63,558 during the previous school year. These included 24,288 students in basic education (a 7% increase) and 43,188 students in high school completion programs (almost 8% increase). The high school figures included enrollment in the television program, "Your Future Is Now," presented over the S. C. Educational Television Network. An additional 4,532 students were enrolled in continuing education enrichment programs.

There were 4,992 high school completion credentials issued during the school year — including 2,135 high school equivalency certificates and 2,857 diplomas. A total of 2,711 students earned eighth grade achievement certificates.

A total of \$3,951,726 was appropriated for adult education during the year, including \$1,190,918 in federal funds, \$1,854,160 in state funds, and \$425,000 from the State Committee for Technical Education for the joint funding of adult education programs in technical education centers. Other sources of funds included the Employment Security Commission, the Office of Economic Opportunity, and the Southern Regional Education Board.

The South Carolina Comprehensive Manpower Program, established this year by the Governor's Office, is the agency through which state and federal funds are channeled into local agencies and organizations sponsoring manpower development programs. Agencies supported in their adult education programs included the Office of Economic Opportunity; the S. C. Employment Security Commission; the Columbia Urban League; community action agencies in Sumter, Florence, and Cheraw; the S. C. Department of Corrections; Manpower Development Training Act skill centers; technical education centers; area vocational centers; the S. C. Literacy Association; and the National Youth Corps of Columbia.

General education programs to upgrade on-the-job proficiency and potential for employees in industrial plants are being provided through the cooperative efforts of school officials and local industrial leaders. A number of companies give employees compensatory time-off for this training.

Teachers and administrators conducted 135 workshops in methods of instructing undereducated and disadvantaged adults, attended by 5,077 people. Local adult education directors — along with some superintendents and school board members — attended a June conference on "Adult Education, a Community Project," keynoted by Thomas Mann, vice chairman of the National Advisory Council for Adult Education. At the conference, Charles Thompson, director of adult education for Sumter County District #17, was named "Adult Education Director of the Year."

New techniques for recruiting students continued to yield significant enrollment gains in adult basic education. These techniques included additional local centers, increased involvement with local agencies and organizations, and assistance of church groups in providing facilities and disseminating information about local programs. These methods were particularly successful in Jasper, Orangeburg, and Marion counties. Significant enrollment gains were also achieved in programs which employed full-time directors of adult education.

The adult driver training program enrolled 1,530 adult students in 80 classes.

A grant from the Southern Regional Education Board enabled the University of South Carolina School of Education to offer a master's degree program in adult education and South Carolina State to offer graduate courses in adult education. More than 100 adult education teachers were enrolled in graduate and undergraduate extension courses at these two institutions.

Full-time adult basic education teachers have been installed in vocational rehabilitation centers in Columbia, Charleston, and Florence.

Learning laboratories — with individualized instructional programs — were maintained in four public libraries.

Adult education staff members attended 36 hours of training in accountability, comprehensive adult education programming, and the emerging crisis in the rural-urban population flow.

The Iowa Test of Basic Skills continued to be used as a diagnostic instrument to indicate whether or not applicants are capable of passing the General Educational Development High School Equivalency Examination and the particular areas in which the student was deficient, if he was judged incapable of passing the GED. Subsequent research indi-

BEST COPY AVAILABLE

cated its value for diagnosis. Of students who were given a 60% chance of passing the GED on the basis of their ITBS scores, more than 80% passed the GED on their first try. Research is continuing to refine the degree of accuracy for future ITBS-based predictions. Every adult education program in the state has been provided with the ITBS instrument — by which 3,437 people were screened.

The Office of Adult Education continued to encourage daytime programs for parents while youngsters are in school and for "second shift" industrial workers unable to attend night classes.

The Information section, in addition to publishing news and feature stories in all of the state's 110 newspapers, continued to publish "Adult Education Newsletter." It also produced a booklet "Adult Ed Goes Over the Top," and two brochures. The section cooperated with the Curriculum section in producing a series of 15 adult education television programs which were aired over all open-circuit ETV channels. Radio and TV spots promoting adult education were sent to the electronic media.

Veterans Education and Training

During the period April 1972-April 1973, South Carolina had a net 31.3% increase of Vietnam veterans in training, 17.4% above the national average and second only to Alaska with 62.2%. During this same period, South Carolina was fourth in the nation for increased original entries into training with 23.6%.

Allowances paid by the Veterans Administration to veterans and their dependents for education and training increased from \$17.9 million to \$26.6 million or 37%.

Public Law 92-540, amending the "G. I. Bill of Rights," became law on October 24, 1972. This legislation increased allowances for veterans and their dependents by approximately 27% for institutional training and 48% for on-job and apprenticeship training, and secondary, refresher, and remedial courses. This amendment should reflect an increase in participation during fiscal 1974.

Directories were published listing all institutions with approved courses for veterans and other eligible persons and listing all training establishments with approved on-the-job and apprenticeship programs.

A workshop was held for all flight school operators with regulations being adopted to eliminate veterans who were not maintaining proficiency. Veterans must fly a minimum of 20 hours per quarter to continue their program.

Workshops on advance tuition payments were held in Greenville, Columbia, Florence, and Charleston in cooperation with the Veterans Administration.

This section utilizes the "shopping center" concept in which all personnel assist veterans and their dependents in the preparation of various VA forms and assist institutions and establishments in preparing applications for approval of courses and programs. The staff endeavors to have a knowledge of all laws pertaining to veterans and their dependents to advise them of their benefits.

Proprietary School Law

In administration of this law, this section endeavors to maintain the highest possible standards in licensing schools and issuing permits to salesmen, for the protection of the health, safety and general welfare of the people of this state.

The number of permits issued to salesmen more than doubled this year from 201 to 422. The number of students enrolled in these schools has increased by 5.7% with the largest increase in out-of-state correspondence schools.

A directory of the institutions and the courses meeting the requirements of the law was published.

The State Board of Education adopted a report recommending to the appropriate committee of the General Assembly changes in the Proprietary School Law. These recommendations would provide more adequate protection for the students' financial investment, in the event a Proprietary School ceases operation for financial or other reasons. A revised refund policy is being developed which will provide a more suitable return of unused tuition in the event that the student discontinues his training.

Fifty licenses have been issued to South Carolina schools and 44 approvals to out-of-state schools. A total of 9,058 students have been enrolled in institutions covered by this law. The largest number of enrollees is in out-of-state correspondence schools.

South Carolina Free Tuition Law

The responsibility for administering this law which provides "Free Tuition for Certain Veterans' Children" was assigned to this section in June 1972.

In cooperation with the South Carolina Department of Veterans' Affairs and the Veterans' Administration, this section determines the eligibility of the applicants. The State Board of Education adopted guidelines for determining eligibility and ascertaining need for financial assistance.

Prior records of applications received, approvals and rejections were not complete. Applications have increased by 26% over an unconfirmed report of the prior year. Of 73 applications received, 52 were approved and 21 rejected.

Civil Defense Education

The primary missions of the Civil Defense Education Section were:

1. to expedite incorporation of the Personal and Family Survival (PFS) teaching resource unit into high school curricula, and
2. to assist local school districts in the development of update of Emergency Preparedness plans consistent with local Civil Defense plans.

During the year, 174 PFS units were conducted in 34 schools in 18 districts, with 5,145 student completions. Units of Government in Emergency were conducted in eight schools in seven districts, with 2,077 student completions. Of these student completions, 1,104 were in grades 1-6. A special unit "In Time of Emergency" was conducted in two schools, with 160 student completions.

Five initial teacher training courses were conducted in five counties, with 34 teacher completions; 22 PFS refresher courses were conducted in 11 counties, with 53 teacher completions. A total of 11 district Emergency Preparedness plans were completed.

Future expectations are to have an emergency preparedness teaching program in each school and an Emergency Preparedness Plan developed by each school district.

FEDERAL PROGRAMS

The chief missions of the office are (1) to assure proper and effective use of federal funds toward the achievement of the objectives of each federal program and (2) to assure effective use of available resources to achieve the objectives of the office, division, and Department.

The office is responsible for state plan or application assurances and for other requirements imposed by each act and federal regulation for Elementary-Secondary Education Act Titles I, II, and III, Title I Migrant Program, National Defense Education Act Title III, Public Law 89-313 Education of the Handicapped Act, Part B, and the Education Profession Development Act. Specifically, the Office is responsible for planning project administration, evaluation, dissemination, reporting financial management and other functions required in the administration of these federal programs and other assignments.

Title I, ESEA

During the school year of 1972-73, South Carolina was allocated \$29,853,231 under Title I of the Elementary and Secondary Education Act. These federal funds are made available to local school districts and state institutions to meet the needs of economically and educationally deprived children. Title I funds are used by local school districts to finance educational programs for educationally deprived children, including children of migrant agricultural workers. Funds are also used by state supported agencies to provide educational programs for handicapped, neglected or delinquent children.

Ninety-four districts and five state institutions submitted projects which were approved for a total amount of \$28,210,702. Uncommitted funds in the amount of \$2,105,458 will be used during fiscal year 1973-74 as authorized by carry-over provisions of the Tydings amendment.

Each district and state institution developed activities which were educationally designed to meet the most critical educational needs of deprived children. As was the case during 1971-72, reading was determined to be the most critical educational need. School districts expended \$8,383,837 for reading activities for 94,971 students. Other activities such as mathematics, drop-out prevention, pre-school, summer remedial programs, and various supportive type services provided special compensatory assistance to 197,734 participating South Carolina school-age children.

The charts illustrate the nature and extent of Title I expenditures during the 1972-73 school year. All data used in compiling the charts was taken from approved project applications for the period ending June 30, 1973.

Handicapped-Neglected And Delinquent

Five state agencies, operating exclusively for the handicapped, and the neglected and delinquent, received \$1,033,576 to develop and conduct supplementary programs for 4,209 students in ten institutions. Agencies were the Department of Mental Retardation, School for Deaf and Blind, South Carolina Opportunity School, John de la Howe, and Department of Youth Services.

Title I (Migrant)

Supplemental Title I funds amounting to \$592,089 were received during 1972-73 to conduct special programs for children of migrant agricultural workers. The Department contracted with 10 school districts to provide these services. Educational centers for migrant children were located in the counties of Aiken, Allendale, Beaufort, Charleston, Clarendon, Dillon, Darlington, Hampton and Spartanburg. Approximately 1,195 children received special services under this program.

Title II, ESEA

Title II of the Elementary and Secondary Education Act of 1965 authorizes "a program for making grants for the acquisition of school library resources, and other printed and published instructional materials for the use of children and teachers in public and private elementary and secondary schools."

During fiscal 1973, the State Department of Education allocated \$1,069,065 of Title II funds to 94 school districts and seven state-supported schools. Project applications were in turn submitted by the school districts and state supported institutions to the Department for review. As of June 30, 1973, the Department approved projects in the amount of \$1,037,817. An unapproved amount of \$88,415 will be used by school districts and state institutions during 1973-74 under the carry-over provisions of the Tydings amendment.

Title II funds were directed toward acquisition of school library resources and other published instructional materials designed to meet critical instructional needs.

Funds made available for acquisition of instructional materials resulted from the statewide assessment of critical needs, and adoption by the State Board of Education of 11 major objectives for education in the state.

The funds utilized for this purpose focused on three critical needs:

1. Improved achievement in the basic skills (reading and mathematics).

2. Reduction of the dropout rate.

3. Reduction of first grade failures.

More specifically, those funds provided specialized individual classroom materials for clearly defined groups of children who indicated a measurable need for a special program. The materials were not intended to be cataloged as library resources although this was permissible.

The chart below reflects the amount of Title II funds by category that were approved for expenditure during FY 1972-73, based on data compiled from the 99 approved projects as of June 30, 1973.

1. Library books	\$ 640,248.42
2. Periodicals	13,465.54
3. Audio-visual materials	240,644.40
4. Individualized instructional materials	91,633.40
5. Processing	56,560.24
	\$1,037,817.00

Title III, ESEA

The Title III Program of the Elementary and Secondary Education Act is designed to encourage school districts to develop imaginative solutions to educational problems and to utilize research findings more effectively. Funds for this program are competitive by nature. Each proposal is reviewed and evaluated on its own merits, and projects which receive the highest rating are funded within financial constraints.

South Carolina was allocated \$1,516,071 in program funds for fiscal year 1973. Using provisions of the Tydings amendment, which authorizes the Department of Education an additional year to obligate funds, an additional \$120,000 was available for a total of \$1,636,071 to continue existing projects. Of this amount, \$886,027 was obligated to continue 30 projects initiated in 1971 and 1972, and \$284,576 was obligated for activities relating to guidance, counseling, and testing.

In addition, 20 new projects listed below were initiated at a cost of \$465,468.

Laurens #56 - Consortium Program for Trainable Children (36,400)
Anderson #2 - Engineered Program for Emotionally Disturbed (21,000)
Anderson #5 - Educational Evaluation Center (30,900)
Richland #2 - Dealing with Learning Problems (19,500)
Marlboro - Developmental Program for Trainable Children (32,000)
Greenville - Behavioral Intervention - Emotionally Disturbed Children (4,300)
Laurens #55 - Unmet Needs of Laurens Handicapped (33,800)

Saluda - Unmet Needs for Saluda Handicapped (17,500)
 Kershaw - New Opportunities for Gifted Children (22,637)
 Richland #2 - Curriculum Development: Gifted and Talented (21,631)
 Beaufort - Reading Power Through Communication Skills (17,500)
 Anderson #5 - Project RISE (44,400)
 Lancaster - Auditory Skills Training Program (21,800)
 Greenville - Project COPE - Career Oriented Program of Electives (22,-
 100)
 Spartanburg #1 - The Interchange Room (11,000)
 Spartanburg #3 - Adolescent Headstart for Exceptional Children (11,-
 200)
 Anderson #1 - Providing for Emotionally Handicapped Children
 (9,500)
 Spartanburg #7 - Making Mathematics Meaningful (28,900)
 Richland #2 - Dropout Prevention: Scientific Heuristic Approach (30,-
 600)
 Spartanburg #7 - Program Planning for Gifted Children (25,000)

Title III, NDEA

Title III-A of NDEA authorizes two major programs for strengthening instruction: (1) Section 302(a) provides 50-50 matching funds for acquisition of laboratory and other special equipment and materials, including minor school remodeling, to improve elementary and secondary education in science, mathematics, history, civics, geography, economics, modern foreign languages, English, reading industrial arts, arts, and humanities. (2) Section 302(b) provides funds for state supervisory and related services to improve the teaching of these subjects in public elementary and secondary schools. Under this section, \$26,695 was made available to the Department of Education for maintaining state personnel assigned to NDEA Title III.

Despite the fact that Section 302(a) was not funded during the 1972-73 school year, 44 districts were eligible to submit projects for the utilization of \$132,362 of unobligated fiscal 1971-72 funds as authorized by carry-over provisions of the Tydings amendment.

The chart below estimates the amounts of carry-over funds obligated in the 12 eligible subject areas, based on priority-approved projects submitted to the Department as of June 30, 1973.

1. Science.....	61,159
2. Reading.....	25,809
3. English.....	11,899
4. History.....	10,633
5. Mathematics.....	8,234
6. Industrial Arts.....	7,518

7. Geography	3,141
8. Arts	2,757
9. Modern Foreign Languages	1,212
10. Humanities	-0-
11. Civics	-0-
12. Economics	-0-
Total	132,362

In order to insure utilization of all NDEA III carry-over funds from fiscal 1972 appropriation, a procedure was initiated to have all school districts release funds if they were financially unable to match these funds at the required 50% level. The purpose of this action was to reallocate funds to districts that requested additional funds and could match them at the 50% level. Total amount of funds released and reallocated to 61 districts was \$36,628.

Public Law 89-313, EHA, Part B

Federal Public Law 89-313 provides funds for the initiation, expansion, and improvement of programs designed to meet educational and related needs of handicapped children.

During fiscal 1973, South Carolina was allocated \$394,334 for special programs for handicapped children and \$240,208 was used to continue seven projects initiated in 1970. The joint submission with Title III, ESEA on December 1, 1972 produced 38 projects competing for funds for the handicapped. Ten projects were funded using EHA, Part B funds and another 12 projects were funded using Title III funds.

Projects continued for the third year are:

Florence #1	Methods, Materials, and Curriculum Development	\$33,056
Clarendon #3	Diagnostic and Prescriptive Services	35,941
Fairfield	Project: Learning Assistance	55,502
Spartanburg #5	Social Remediation of Associative Disabilities	16,380
Greenville	Center for Learning Disabilities	21,106
Aiken	Diagnostic/Prescriptive Special Education	42,108
Charleston	Diagnostic/Prescriptive Teaching Program	36,115
		<u>\$240,208</u>

New Title VI projects funded for one year are:

Spartanburg #2	Early Identification of Handicapped Children	\$17,300
Lancaster	Meeting Needs of Handicapped Children	13,600
Spartanburg #7	The Mainstreaming Project	32,700
Kershaw	Learning to Cope	8,788
Florence #4	Itinerant Services for Visually Handicapped	22,100
Lexington #2	Primary Education for Aurally Handicapped	8,000
Greenwood #51	Consortium Program - Low Incidence Handicaps	10,600
Richland #1	Middle School Adjustment Program	15,500
York #2	Cooperative Teaching for Learning Disabilities	6,800
Newberry	Unmet Needs of Newberry Handicapped	19,033
		\$154,421

Education Profession Development Act

The state received \$118,182 for recruiting and qualifying teachers and teacher-aides to alleviate critical shortages. Only one project, with three components, was approved. This project is being coordinated by the State Department of Education for training teachers in early childhood education (\$12,200); training teachers of the handicapped (\$44,810); and training trade and industrial teachers (\$51,171).

Title V

Title V funds continued to be utilized for strengthening the State Department of Education's leadership role. Supporting funds were provided for the increasingly important role of the Office of Personnel and for those consultation services in General Education which were expanded as a result of the Five-Year Plan program. Dissemination activities received continued support.

The Department completed implementation of the major activities recommended by an Office of Education Title V Program Review Team in the establishment of the position of Coordinator of Federal Funding. This office was phased in over a four month period beginning July 1 and completed in November. Title V administrative responsibilities were

shifted to this office in order to secure more effective coordination over a program which is essentially Departmentwide in its scope.

Planning funds extended and expanded program operations in research, planning, evaluation, and leadership development.

Uncertainties surrounding continued funding were coupled with rising cost problems to create some concern regarding the best method of utilizing Title V funds for new Departmental undertakings.

TEACHER EDUCATION AND CERTIFICATION

The school year 1972-73 was a time of extensive deliberation concerning teacher education and certification requirements. Early in the year the State Superintendent of Education and the State Board of Education appointed a 37-member committee, broadly representative of educational interests in the State, to study teacher education and certification requirements. Laurens Floyd, chairman of this committee, reported to the State Board of Education on June 8, 1973.

After serious study, the State Board of Education approved the recommendations made by the study committee. Recommendations adopted included:

1. The use of the National Teacher Examinations should be continued as a measure of cognitive knowledge of prospective teachers until a better measure can be developed.
2. The issuance of warrants should be discontinued by May 1, 1974.
3. A maximum composite score of 950 on the National Teacher Examinations should be established for receiving a credential to teach in the public schools of South Carolina.
4. The National Teacher Examinations should not be determinants of teachers' salaries.

During 1972-73 the State Board of Education also adopted two regulations which had the effect of easing somewhat the certification of experienced teachers.

One regulation enabled teachers to advance their teaching credentials to a higher classification at any time during the academic year. Prior to this time, teachers were required to meet credit requirements by September 15 in order to derive the benefits of an improved credential for the school year. Now teachers earning masters' degrees in the middle of an academic year may realize an immediate advance in their credentials and subsequent increases in salary.

The other major change in certification regulations was the waiver of specific course requirements for out-of-state graduates of teacher education programs approved by NCATE. This change substantially eased the way toward full certification for teachers coming to South Carolina from other states.

The State Board of Education also gave its approval to graduate programs in school administration at The Citadel and Winthrop College. Undergraduate programs for the preparation of guidance counselors were also approved at Limestone College and Newberry College.

In-service programs enabled nearly 7,000 teachers to earn credits toward the renewal of teaching credentials during the year. These programs were conducted in 14 school districts and two other educational agencies.

The State Board of Education adopted a five-year plan to provide adequate professional personnel to staff the public schools. A significant activity outlined in the plan will be the evaluation of each teacher education program in the state within the next two years.

The Office of Teacher Education and Certification maintains active files on all South Carolina teachers, constantly evaluating teachers' records and mailing new credentials to teachers who have completed advanced study or additional years of teaching experience.

The office mailed out approximately 20,000 teaching credentials during the year. Included in this number were nearly 6,000 new credentials issued to teachers who were teaching out of their certified fields. An additional 112 emergency permits were issued to persons who did not qualify in any teaching area but who were required to fill vacancies in the schools.

ADMINISTRATION AND PLANNING PLANNING

The State Board of Education has identified eleven priority areas for educational improvement and adopted a five-year plan to meet each of the 11 major Objectives. The Office of Planning was created in 1970 to coordinate the development of the five-year plans and the Department's planning activities.

Second year activities were initiated this year for eight of the major objectives in accordance with the five-year plan. Final data reports received during the year indicated that most of the first year objectives were met and substantially exceeded in several cases.

Department planning committees developed detailed plans for the three remaining major objectives which included yearly objectives, strategies, activities, associated costs, and an evaluation design. In February 1973, the Board approved five-year plans to promote programs to provide adequate and qualified professional and para-professional personnel to staff the State's educational system, to develop and maintain a system of continuous evaluation and upgrading of education, and to insure the implementation of at least a defined minimum program in each local school district.

One of the major accomplishments of this year has been the installation of a Departmental planning cycle beginning in March and ending in June. Planning committees for each of the major objectives were re-activated and the five-year plans were updated for the next two fiscal years. The scheduling of the Department's planning cycle was designed to complement the Department's budget development cycle and subsequent budget review and approval by the Board.

Planning documents developed this year by the planning committees have been published for distribution to interested educators. Format of the documents was altered this year to permit the associated costs to be indicated next to each activity and to incorporate a management procedure to facilitate the monitoring of the plan while it is being implemented.

*Data collected according to a new definition of the dropout, i.e., a pupil who leaves school for any reason, except death, before graduation or completion of a program of studies and without transferring to another school, indicates that the revised 1972 status is 7,382. The second objective is based on this figure.

**Data collected according to new definitions and procedures indicate that the revised 1972 status is 33,454.

FIVE YEAR PLAN

First Year Data
1971-72

BEST COPY AVAILABLE

MAJOR OBJECTIVE	1971 Status	Goal	1972 Status	Above Goal	Below Goal
REDUCE DROPOUTS 50% * To reduce the number of drop- outs in grades 9-11 from 16,500 to 14,025	16,500	14,025	12,800	+1,225	
REDUCE FIRST GRADE FAILURES To reduce the percentage of stu- dents repeating the first grade from 15% to 12%	15%	12%	8.3%	+3.7%	
STATEWIDE KINDERGARTEN SYSTEM To increase the number of five year olds attending public school kindergarten from 7% to 10.5%	7%	10.5%	10.65%	+0.15%	
IMPROVE INSTRUCTION IN BASIC SKILLS To reduce the number of students in S. C. schools scoring in the lowest quartile in basic verbal and quantitative skills by 4,000	318,008 (52.1%)	314,008 (51.8%)	298,146 (49.2%)	+15,862 (2.6%)	
OCCUPATIONAL TRAINING To increase the number of pupils enrolled in prevocational and occupational training programs from 43,000 to 54,405	43,000	54,405	60,193	+5,788	
INCREASE POST-HIGH SCHOOL ENROLLMENTS To increase post-high school enrollment from 50% to 55%	50%	55%	51.3%		-3.7%
COMPREHENSIVE PROGRAM FOR THE HANDICAPPED ** To increase the number of handi- capped pupils enrolled in ap- propriate educational programs from 29,430 to 36,450	29,430	36,450	35,256		-1,194
DOUBLE ADULT EDUCATION ENROLLMENT To increase the number of Adult Education enrollees from 40,000 to 55,000	40,000	55,000	63,558	+8,558	

PUBLIC INFORMATION

A slide-tape program, supplemented by printed materials, was produced to describe first-year results of the state's five-year plan for public school progress. It was shown to legislative committees and other audiences.

"Where It All Begins", an audiovisual show depicting South Carolina's structure for public education and the Department's organization and services, was also produced.

The State Teacher of the Year program and meetings of the Student Advisory Council to the State Superintendent of Education were coordinated.

One of the weekly radio programs, "Emphasis Education," received a national award for excellence from the National Association of State Education Department Information Officers.

Production capabilities were expanded by establishment of a photographic darkroom. Regular meetings were conducted with information specialists in Vocational Education and Adult Education to give more effective direction and purpose to the department's overall public information activities.

The director serves as state coordinator for the National School Public Relations Association. He also served as a consultant for graduate courses in school-community relations at South Carolina State College and The Citadel.

Publications

South Carolina Schools quarterly magazine, with a circulation of 35,000, was augmented by a monthly six-page newsletter with the same name which is distributed to superintendents, board chairmen, State Board of Education members, members of the department staff, legislators, the press, and other educational leaders. The newsletter's circulation is 5,000.

S. C. School Directory information was computerized for the first time and Data Center printouts used for the major portion of this publication. The *State Superintendent of Education's Annual Report* also made wide use of computer printouts to provide camera-ready copy in an effort to expedite printing and minimize proofreading.

Other major publications designed and edited during the fiscal year included:

- Personnel Administration and Evaluation*
- Ethnic Contributions to U. S. History*
- Building Elementary Reading*
- Administrator's Handbook for Art Education*

Music in the Middle School
Drug Education Concepts in Physical Education
Science Education K-12, Administrators' Planning Guide
Preventing Drop-outs: A Curriculum Guide
Learning Centers: Children Alive
Good Mental Health in the Classroom
Early Childhood Education

TECHNICAL ASSISTANCE

Assistance was rendered to 45 of the 49 districts applying for continuing the Emergency School Assistance Program II. These 45 districts received a total of \$1,297,393 to continue the ESAP II projects through January 31, 1973.

Six non-profit civic organizations received \$39,168 to extend their supportive educational programs through January 31, 1973.

Requests for information and assistance on preparing applications for Emergency School Assistance Act funds came from 70 of the 93 school districts in the state. The office rendered 216 services in preparing these applications.

Forty-two districts submitted 45 projects competing for \$7,178,174 in basic grants and \$1,824,959 in pilot grants. Ten of the 42 districts received approval by the Office of Education, but the Office of Civil Rights did not clear their applications for funding. The ten district proposals were approved for funding in the amount of \$2,008,851.

Thirty-two districts received basic grants amounting to \$4,824,799 and pilot grants in the amount of \$1,250,126, totaling \$6,074,925.

Fifteen non-profit organizations submitted project proposals and were granted \$887,173.

The Adams-Richardson decision rendered by U.S. District Judge John H. Pratt on February 17, 1973 was the basis for ruling three districts not in compliance with the Civil Rights Act of 1964. All other districts in the state have operated in compliance with the act.

RESEARCH

The Office of Research is charged with the responsibility of developing, maintaining and providing management data and information for Department of Education and local school personnel.

The primary mission of the Survey section is to conduct surveys of district educational programs in order to identify strengths and weaknesses and report recommendations for improvements.

During 1972-73 the following surveys were completed: school facilities and personnel for Florence District 1, York District 4 school facilities, staff and school building needs for Oconee County, comprehensive survey for Florence District 4, school building needs for Lexington District 1, and school facilities for Greenwood District 50. Annual editions of *Rankings of the Counties and Districts* and *School Districts of South Carolina. Organization and Administration* were also updated and distributed.

The staff participated in the School Boards Association institutes for training school board members and served on the Department's planning committee for the development of *Criteria for Implementing a Defined Minimum Program for South Carolina School Districts*.

Two major accomplishments during the year were development of a "District Profile" form which contains pertinent statistical data and a mechanism for school district personnel to use in assessing their needs.

The legal staff monitored and reported South Carolina legislative action pertaining to education and provided legal information services to local districts. *Students' Rights, Responsibilities and Resources in South Carolina*, a handbook for school administrators to use when answering student questions on laws, was revised.

The Research Utilization section, established in July 1970, continued to provide the entire state school system with educational information in response to requests and special assistance in the utilization of information. Information services were expanded from the initial two target districts, Charleston and Rock Hill, to surrounding school districts.

Such innovations as learning resources centers, improved school bus discipline, dropout prevention projects and behavior modification resulted directly or indirectly from the information provided by the section. Information packages were also used to exchange teaching techniques, administrative policies, to write federal projects and to upgrade professional knowledge. During the fiscal year, the section processed 1,903 requests from local school personnel.

The Communications Services Unit produced publications for the Office of Research and other Department offices. Documents were edited and typeset camera-ready by this unit.

A slide-tape presentation, "A Focus on RIU," and several technical papers on current issues in education were also developed.

The National Dissemination Project, designed to strengthen existing national communication channels for educational information, was discontinued June 30, 1973 when its two-year federal grant expired.

The Management Information Unit, formerly the Statistical Unit within the Office of Research, was designed to strengthen the Department process of collecting, retrieving, and assembling statistical information. A computer terminal was installed allowing direct access to a computer time-sharing system located at the University of South Carolina. The terminal has been used in preparing various reports, visual aids, projections, samples and other analytical data for state and district personnel.

The office also helped coordinate and implement the Basic Educational Data System, completed the federal Elementary-Secondary General Information Survey for 1972-73, and published a series of statistical handbooks reporting enrollment projections, rankings of districts and schools, financial data, and private school statistics. Current studies of superintendents and principals' salaries and data on the ages of pupils in each grade were also published and distributed. The office also aided in development of data analysis for the Office of Vocational Education and participated in the National Education Finance Project as a means of exploring alternative methods of financing education in South Carolina.

The Evaluation and Testing Unit, working cooperatively with other offices, gathered assessment data related to the 11 major objectives adopted by the State Board of Education.

The annual evaluation of the major objectives for 1971-72 showed that stated goals in six objectives were met. These were:

1. reduction in dropouts,
2. reduction in first grade failures,
3. increase in kindergarten enrollment,
4. improvement of basic verbal and quantitative skills,
5. increase in adult education enrollment, and
6. occupational training.

More than 100,000 fourth, seventh, ninth, and twelfth grade students participated in the program. Test results were disseminated to students, teachers, local school administrators, the Department staff, the State Board of Education, and to the general public through county libraries.

Workshops were held to assist test coordinators, district superintendents, teachers and other interested school personnel in the administration of tests and in the interpretation and use of results.

EDUCATIONAL DATA CENTER

The Educational Data Center was established July 1970 to operate administratively within the Department of Education, but to serve data needs of Technical Education Commission, the State Library and Educational Television as well. Because of natural ties to TEC, it also serves the State Development Board.

A major thrust in 1972-73 was the design, programming and implementation of an inventory system to serve the newly formed Higher Education Facilities Commission. It provides information on buildings, rooms, and space utilization at public and private state colleges and TEC centers. Management reports from the system provide a statistical base for in-depth analysis of this data and alleviate burdensome federal data collection from the various institutions.

A new computer system is also in use to serve the state audiovisual library by scheduling educational films based on requests and reconciling the return of all films after use in schools.

Continuing refinements are being made to the Basic Educational Data System (BEDS) as a basis for accreditation of public schools. Based on standards and other criteria, the computer system collects and compares standards and actual data for scrutiny by state educational supervisors. BEDS also serves management needs at both state and school district levels and supplies data for federal government reports. These data needs were formerly filled by extensive clerical efforts.

A site selection system is operative for the Development Board, allowing industrial prospects through the Development Board to search a master file containing potential desirable industrial sites.

In cooperation with TEC, the Data Center has developed and implemented a student information system. This system has the immediate effect of assisting in student registration and producing grade reporting. Designed in modular fashion, it is planned that this will become the supply module of a larger Occupational Training Information System (OTIS). OTIS will include modules for supply, demand and follow-up to create optimum correlation between industry personnel needs and trained personnel. The follow-up module would assist in evaluations.

The Educational Data Center plans to develop and implement additional systems in concert with the priorities of those served. New operations will be oriented largely to management needs and the data drawn from existing files.

FINANCE AND OPERATIONS

FINANCE

Accounting

The Office of Finance was reorganized on July 1, 1972 to include all accounting personnel to improve efficiency and effectiveness of accounting support services.

The Department and school districts were required to formulate and implement indirect cost allocation plans to enable them to claim the federal share of overhead costs attributable to each federal program. A State plan for school districts was developed and statewide meetings were held to assist districts in the preparation and implementation of the plans.

State Aid

State aid amounting to \$163,884,043 was paid to the 93 school districts for teachers' salaries, including adjustments for previous years and for teachers of homebound students.

Average state aid salary paid for 23,879 academic teaching positions was \$6,819. Average supplement from local and other funds was \$1,240, making a total average salary of \$8,059.

State aid amounting to \$8,353,581 was paid to districts for 945 noncaching principals, supervisors and special teachers. Operation funds in the amount of \$11,066,595 were disbursed to school districts.

Attendance

Ten-day enrollment for 1972-73 shows a decrease of 6,343 students from the previous year — 4,752 fewer white students and 1,591 fewer Negro students. Average daily attendance was 89.94% of the ten-day enrollment. The 35-day enrollment for the year was 632,721 or 98.38% of the ten-day figure.

Attendance supervisors held area and statewide meetings, along with many individual conferences to discuss dropout surveys, record keeping, reporting forms, and child welfare programs.

PERSONNEL

The Personnel Office functions as a service unit responsible for the various aspects of employer-employee relations programs.

During the past year the staff devoted much time to the development of an up-to-date Department Policies and Procedures Manual and the initial Affirmative Action Plan for Equal Employment. In addition to these projects, the office coordinated an in-service program for experienced secretaries.

During 1973-74 the payroll functions previously assigned to the Finance Office will be assigned to the Personnel Office. This merger will provide more staff flexibility and better coordination of required records.

SCHOOL FOOD SERVICE

During the 1972-73 school year, 1,112 schools participated in the national school lunch program. These schools served nearly 80 million Type A lunches to approximately 468,000 children. Of these children 52% received meals free or at reduced prices. Based on average daily attendance, 79% of all children in school participated in the School Lunch Program.

Under the special milk program, approximately 27 million one-half pints of milk were served to children in addition to milk served with lunches and breakfasts. This represents an increase of about 15 million one-half pints served during the preceding school year, due to the introduction of chocolate milk as an option.

Breakfast programs operated in 180 schools, serving nearly 4 1/2 million breakfasts to approximately 27,000 children. Of those children, 90% ate free or reduced price breakfasts.

Equipment was purchased for 92 schools under the Nonfood Assistance Program.

Wholesale value of U.S. Department of Agriculture commodities allocated to schools amounted to over \$6 1/2 million, and an additional \$1 1/2 million was distributed in cash in lieu of commodities.

USDA federal reimbursements to schools for lunches, breakfasts, milk and equipment amounted to \$24,304,454. Total school food service program operations in South Carolina for 1972-73 amounted to over \$57,065,189.

SCHOOL PLANNING AND BUILDING

Major missions of the Office of School Planning and Building are:

1. Review and approval of state and federal funds for construction.
2. Provide information and assistance to school districts of South Carolina in planning school facilities.
3. Ensure that sites, plans, and specifications of new school facilities meet criteria of state school laws, regulations, and applicable building codes.
4. Final Inspection of buildings to evaluate and approve compliance with plans and specifications.

Evaluation and consultative services included: 19 school sites inspected and approved; school facility surveys in six districts; special surveys in three districts; and seven assembly plant inspections of relocatable buildings (portable classrooms) at plants in Georgia, Kentucky, Virginia and Florida.

Inspected and approved were: 11 new schools, 50 additions and renovations, and relocatable buildings at 15 schools.

Results of county and district surveys of school facilities are published in research reports. Surveys made included Oconee County, Greenwood District #50, Florence District #4, Marion District #3, Lexington District #1, and York District #4.

Special surveys were conducted in Abbeville, Clarendon and McCormick counties to aid each district in solving a particular need related to school facilities.

Review of plans, field inspections, and plant inspections provide a means of ensuring compliance with laws, regulations, plans and specifications, and building codes.

Results of maintenance surveys are reflected in major renovation projects in Richland District #1, Hampton, Barnwell, Clarendon and Laurens counties.

State Legislation

The State Board of Education may prescribe regulations to provide for inspection and classification of all elementary and secondary schools. (Sect. 21-633)

Where bids are received as a result of advertising for the construction of public buildings to be built with funds furnished by the State Board of Education and the lowest bid is rejected and another accepted, any contract based on the bid shall be subject to the approval of the State Board of Education. (Sect. 1)

Trends — School Design and Planning

Trends in school organization are toward the comprehensive high school, and continuing trend toward middle school concept, and in the incorporation of kindergartens in new elementary schools.

Design trends are towards greater use of geometric design of instructional pods in groups of four to eight learning centers, flexibility of interior design, and access to resource materials. Greater utilization of E.T.V., carpeting, and air conditioning, is reflected in much of new school design. A trend toward central kitchens supplying meals to district schools is indicated.

Staff members attended the Interstate School Building Service four-day conference of school planning officials from 18 states, as well as workshops and meetings of the Southeastern and S.C. associations of School Business Officials.

Coordination of preliminary basic schematic plans showing size and arrangements is sought through conferences with architects, school administrators, and Department consultants.

Plans for 1974

Construction and policy manuals from 38 other states are being reviewed for comparative analysis of site selection criteria. Further studies are scheduled.

A more definitive manual to provide architects with helpful information for planning is being considered.

SOUTH CAROLINA SUMMARY OF CONSTRUCTION CONTRACTS PUBLIC SCHOOLS F.Y. 1972-73

New Schools	No. of Projects	Contract Amount	Total Area	Cost Per Sq. Ft.
High Schools	3	5,376,301	329,660	17.75
Vocational/Career	6	5,270,740	273,562	18.66
Middle Schools	1	1,504,900	93,800	16.04
Elementary Schools & Elem/Middle	2	2,421,560	127,000	19.40
	12	\$14,573,501	824,022	
		Average Cost \$17.68 sq. ft.		
Additions Only **				
Vocational & High Schools	10	4,806,171	766,779	22.62
Middle Schools	4	2,551,319	134,531	24.75
Elementary Schools	7	2,127,746	95,849	20.71
	21	9,485,236	497,159	
		Average Cost \$22.69 sq.ft.		

*Based on sq. ft. average of each project

**Additions and renovations excluded

TEXTBOOKS

The Office of Textbooks is responsible for the purchase and distribution of text material under the free textbook program in grades 1 through 8, the rental textbook program in grades 9 through 12, and consumable material for purchase only.

During the year \$2,912,424 was disbursed for new textbooks for the free textbook program in grades 1 through 8. Free textbooks valued at \$13,290,274 were in the schools on June 30, 1973. There is a continuing significant increase in the use of free material in the expanding program for the educable mentally handicapped.

New textbooks amounting to \$1,016,330 were purchased for the rental textbook program in grades 9 through 12 and for supplementary textbooks. A note issue of \$275,000 was made to provide necessary additional funds for purchase of rental textbooks. A \$400,000 note financing previous purchases was retired during the year. Notes outstanding as of June 30, 1973 amount to \$550,000.

Consumable text material amounting to \$381,702 was purchased by schools taking advantage of state-contracted prices. The central library book purchasing program enables schools to receive maximum discounts.

Records are kept of defective books and publishers are required to make appropriate adjustments to the state. An extensive rebinding program is conducted through the Department of Corrections. During the 1972-73 school year 93,410 volumes with a total contract price of \$393,003 were rebound at a cost of \$86,364.41. The cost of rebinding was 21.97% of the contract price.

All elementary schools and most high schools in the state are furnished textbook services. For management purposes the books are handled through approximately 1,100 accounts. Over 650 of these were audited and serviced.

Textbooks submitted for state adoption are inspected to determine if they meet manufacturing specifications. Any deficiencies that cannot be resolved with the publishers are reported to the State Board of Education and the evaluating and rating committees prior to the adoption.

The extension of free textbooks to grades 9 through 12 would be a substantial factor in strengthening instructional programs in high schools. Elimination of the rental fees would also contribute toward reducing high school dropouts. It is difficult to justify the claim of a free school system, and even more difficult to justify the per pupil cost of maintaining a school, unless basic instructional materials are provided free.

Audiovisual Library Section

The Audiovisual Library was organized 10 years ago to provide free 16mm instructional films to the public schools. In this decade the number of prints increased from 629 to 10,138 while the requests jumped from 13,806 to 193,275. Requests have exceeded the supply. In this fiscal year more than 37,000 requests had to be denied because of lack of funds to purchase an adequate number of prints to meet demand.

Title III NDEA funds have been used extensively when available. None were received in 1973. In June 1973, 832 film prints were removed from circulation because they were literally worn out, damaged beyond repair, or obsolete in content matter. These withdrawn prints will be traded in with companies for discounts of film orders. The \$90,721 state appropriation for films for 1973-74, with the discounts allowed for trade-ins, will permit the purchase of approximately 585 film prints. The number of prints available for circulation will continue to decrease with present funding.

A collection of approximately 15,000 prints would serve the schools reasonably adequately. An increase in the state appropriation to \$250,000 annually should keep the library up-to-date and reach 15,000 in five years.

More than 7,500 audio reels and cassettes were duplicated for schools from the library's master tapes this year. Some 3,500 tapes were for modern foreign language programs to accompany newly adopted textbooks. When schools change modern foreign language textbooks, they can return the tapes they have been using to the library where they are erased. New series to accompany new textbooks will be recorded on these same tapes with no charge to the schools. Once schools purchase blank tapes, they should be able to maintain an up-to-date language laboratory at no cost.

TRANSPORTATION

During 1972-73, a total of 5,347 buses were operated on regular routes, an increase of 39 over the previous year. Of these, 452 buses were operated on Head Start and Title I summer programs and 466 buses were used for transporting students to vocational and special education classes and to other programs.

The mileage and number of students transported for the various programs are shown below:

	<i>Students Transported</i>	<i>Mileage</i>
Regular school program	389,549	41,590,713
Vocational classes	15,600	739,768
Special education classes	3,128	188,680
Title I and Head Start	12,898	808,070
Other programs	3,948	464,046
Extra-curricular activities		537,765
	TOTAL 44,329,042	

The number of students transported increased by 11,821, due primarily to reassignment of pupils in several districts and opening of new schools. The average number of students transported per day per bus was 66 and the average miles per day per bus on regular routes was 45.

A total of 550 new buses were purchased for replacements and to serve new routes at a cost of \$3,619,396.56. Ten hours of organized in-service training was provided for all mechanical personnel.

Of 9,745 prospective drivers enrolled in the school bus driver training courses, 6,267 were certified to drive. The *School Bus Drivers' Handbook* was revised to include the new type of road signs. Supervisors of transportation and driver training instructors participated in 1,200 safety meetings with bus drivers and substitute drivers.

A total of 697 accidents involving \$100 property damage or personal injury occurred during the year. This amounts to one accident for each 63,600 miles.

Primary goal for 1973-74 will be to reduce standees as much as possible by more efficient routing and the addition of new routes, provided equipment is available. Instructional materials on the proper procedures for emergency evacuation of pupils riding school buses will be made available to the school districts. Funds have also been requested from the Governor's Highway Safety Committee for adding cross-over mirrors on approximately 2,000 buses that are not presently equipped with them.

^aThe amount of employed time required in a less than full-time position expressed in proportion to that required in a full-time position, with "1" representing one full-time position. Full-time equivalency may be expressed as a percentage or a fraction. It is derived by dividing the amount of employed time required in the less than full-time position by the amount of employed time required in a corresponding full-time position. All full-time equivalency represented above are rounded to whole numbers.

TABLE 27

SUMMARY OF SOUTH CAROLINA HIGH SCHOOL GRADUATES ENROLLED IN
1972-73 COLLEGE FRESHMEN COURSES IN SOUTH CAROLINA^a

Percentage of completed courses passed by South Carolina freshmen	89%
Total high school graduates admitted first semester	15,017
S.C. high school graduates admitted first semester	10,916
Number of all freshmen who took advanced courses	2,293
Number of S.C. freshmen who took advanced courses	1,726
Number of all freshmen who took sub-freshman courses	1,239
Number of S.C. freshmen who took sub-freshman courses	1,117
Number of all freshmen who withdrew from college	709
Number of S.C. freshmen who withdrew from college	519

The following data is for S.C. freshmen only: COURSE TITLE	Total Courses Passed	Total Courses Failed	Total Courses Taken	Percentage of Courses Passed
English	10,233	957	11,190	91
Mathematics	6,754	1,144	7,898	86
Science	7,864	1,368	9,232	85
History	5,751	937	6,688	86
Physical and Health Education	3,734	117	3,851	97
Language, Foreign	3,707	449	4,156	89
Bible and/or Religion	2,953	148	2,101	93
Military Science	747	26	773	97
Other Social Studies	4,430	734	5,164	86
Education	763	16	779	98
Business Education	1,617	234	1,851	87
Art and Music	2,219	173	2,392	93
Other Subjects	3,591	197	3,788	95
TOTALS	53,363	6,500	59,863	89

^aThose passing and failing and percentage of those passing by subjects as reported by the colleges.

TABLE 28

SUMMARY OF ALL SOUTH CAROLINA HIGH SCHOOL GRADUATES ENROLLED IN 1972-73
COLLEGE FRESHMAN CLASSES IN SOUTH CAROLINA AND OTHER STATES^a

Percentage of completed courses passed by freshmen	94			
Percentage of high school graduates entering college	35			
Number of high school graduates	34,593			
Number admitted to freshmen class	11,999			
Number of freshmen reported	11,016			
Number of students who:				
went out of state	2,172			
took sub-freshmen courses	391			
withdrew from college	287			
The following data is for S. C. freshmen only				
COURSE TITLE	Total Courses Passed	Total Courses Failed	Total Courses Taken	Percentage of Courses Passed
English	9,675	507	10,182	95
Mathematics	6,558	681	7,239	91
